1.0 INTRODUCTION AND BACKGROUND

1.1 Introduction

The public agency issuing this RFP is the Riverside County Transportation Commission (Commission). The Commission was created pursuant to California State law, and is responsible for: 1) Coordinating state highway planning; 2) Adopting regional Short Range Transit Plans; 3) Coordinating transit services; 4) Allocating Transportation Development Act funds; and 5) Coordinating county highway and transit plans with regional and state agencies. Over time, the Commission was charged with several expanded roles, including its role as the principal agency in Riverside County managing the Service Authority for Freeway Emergencies (SAFE), the Congestion Management Program, and the Measure A half-cent sales tax for transportation.

With the passage of Measure A in 1988, \$100 million was identified and committed to the development and implementation of a commuter rail system to serve Riverside County residents and, as a result, THE COMMISSION participates in the ongoing funding and governance of the Southern California Regional Rail Authority (SCRRA), known as "Metrolink". The Commission owns and operates all five (5) commuter rail stations serving Riverside County, and it is planning to add four (4) additional rail stations and a transit center in the very near future.

1.2 Background

RCTC is a member of the five county group that operates Metrolink Commuter Service. Three Metrolink Commuter Service lines serve Riverside County: The Riverside Line, The Inland Empire-Orange County Line, and The 91 Line. RCTC owns and operates all five commuter rail stations serving Riverside County and all stations are ADA compliant, staffed with 24-hour security guards and include amenities such as payphones, bicycle facilities, and vending machines. In order to provide continued safety and security at the Commuter Metrolink Rail Stations, Closed Circuit Television (CCTV) System Maintenance Services are essential.

Proposers are encouraged to visit each station to gain perspective of station sizes and types of equipment to be maintained. Attached is a list of the rail station addresses (Appendix B) and a list of the types of equipment by station (Appendix C).

RCTC is planning the construction of at least four more stations that will be in operation in the future. The scope of work will include those new stations at the time they become operational.

2.0 GENERAL INFORMATION

The resultant contract to be awarded from this Request for Proposal (RFP) will be for three years with an option to extend for two (2) additional one (1) year terms at the Commission's sole discretion.

3.0 PRE-PROPOSAL CONFERENCE/JOB WALK
