## Draft Environmental Impact Report/Environmental Assessment available for Interstate 15 Express Lanes Project Southern Extension (ELPSE)

### Announcement of Public Hearing

**WHAT IS BEING PLANNED?**

The Riverside County Transportation Commission (RCTC), in cooperation with the California Department of Transportation (CALTRANS), is proposing to extend the tolled express lanes in both directions along Interstate (I-) 15 in Riverside County between the cities of Lake Elsinore and Corona. RCTC is the local Project sponsor and CALTRANS is the lead agency under the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA). RCTC and CALTRANS have conducted preliminary engineering and environmental studies to support the Environmental Impact Report and Environmental Assessment (EIR/EA) for the proposed I-15 Express Lanes Project Southern Extension (Project). The Project is intended to improve and manage traffic operations, congestion, and travel times along the corridor by extending the I-15 Express Lanes an additional 15.8 miles. The proposed improvements would extend from El Cerrito Road in Corona, through Temescal Valley, to State Route (SR-) 74 (Central Avenue) in Lake Elsinore. The Project would also add southbound auxiliary lanes between both the Main Street (post mile [PM] 21.2) Off-Ramp and SR-74 (Central Avenue) On-Ramp (approximately 0.75 mile), and the SR-74 (Central Avenue) Off-Ramp and Nichols Road On-Ramp (PM 23.9) (approximately 1 mile). Other Project features include widening 15 bridges, creating multiple express lane access points, and constructing potential noise barriers, retaining walls, drainage systems, electronic toll collection equipment, ramp meters, and signage that would be located within the Project limits between PM 20.3 and PM 40.1.

This Project, as currently proposed, is included in the Southern California Association of Governments (SCAG) 2023 Federal Transportation Improvement Program (FTIP) under the Project's FTIP ID, RIV170901 (Amendment #23-16) and fiscally constrained. The Project is also included in the SCAG 2024-2050 Regional Transportation Plan (RTP)/Sustainable Communities Strategy (SCS) Project List under its RTP ID 3160001 and the Project's FTIP ID. According to the FTIP, the Project cost is estimated to be \$668 million and is proposed to be funded by local agency funds.

Construction activities are anticipated to commence in 2026 and be completed by 2030. Construction is planned to last approximately 36 months.

**WHY THIS AD?**

CALTRANS has studied the effects this Project may have on the environment. Our studies show it will significantly affect the quality of the environment. The Draft EIR/EA explains why. This notice is to inform you of the preparation of the Draft EIR/EA and of its availability for you to read. A hearing will be held to give you an opportunity to talk about certain design features of the Project with CALTRANS staff before the final design is selected. The tentative schedule for construction will be discussed.

**Air Quality Conformity**

Air Quality Conformity requirements apply only in nonattainment and "maintenance" (former nonattainment) areas for the National Ambient Air Quality Standards (NAAQS), and only for the specific NAAQS that are or were violated. United States Environmental Protection Agency (USEPA) regulations at 40 Code of Federal Regulations (CFR) 93 govern the conformity process. Conformity requirements do not apply in unclassifiable/attainment areas for NAAQS and do not apply at all for State standards regardless of the status of the area. The Project is in an area that is extreme nonattainment for the 8-hour ozone (O<sub>3</sub>), serious nonattainment for particles of 2.5 micrometers or smaller (PM<sub>2.5</sub>), and attainment-maintenance for carbon monoxide (CO), particles of 10 micrometers or smaller (PM<sub>10</sub>), and nitrogen dioxide (NO<sub>2</sub>). Therefore, a Project-level air quality conformity analysis was required. The Draft EIR/EA explains the air quality conformity findings.

Not a Project of Air Quality Concern (POAQC).

The Project-level conformity analysis shows that the Project will conform to the State Implementation Plan, including localized impact analysis with interagency consultation for particulate matter (PM<sub>10</sub> and PM<sub>2.5</sub>) and CO required by 40 CFR 93.116 and 93.123. This Project is not considered a Project of Air Quality Concern regarding particulate matter (PM<sub>10</sub> and PM<sub>2.5</sub>) as defined in 40 CFR 93.123(b)(1). A detailed PM<sub>10</sub> and PM<sub>2.5</sub> hot-spot analysis was not completed because Clean Air Act and 40 CFR 93.116 requirements are met without an explicit hot-spot analysis. The Project comes from a conforming RTP and Transportation Improvement Program (TIP). Comments are requested regarding the Project-

	level conformity analysis. On September 28, 2021, the Transportation Conformity Working Group (which includes federal [USEPA and Federal Highway Administration], State [California Air Resources Board and CALTRANS], regional [air quality management districts and SCAG], and sub-regional [county transportation commissions] agencies and other stakeholders) confirmed that the proposed I-15 ELPSE is not a POAQC.			
<b>WHAT'S AVAILABLE?</b>	<p>You can look at or obtain the Draft EIR/EA at the CALTRANS District Office (The Rosa Parks Memorial Building, 464 West 4th Street, San Bernardino, CA 92401) on weekdays from 8:00 a.m. to 5:00 p.m. and at the RCTC office (4080 Lemon Street, 3rd Floor, Riverside, CA 92501) Monday through Thursday from 8:00 a.m. to 5:00 p.m. Maps and other information are also available.
