

Interstate 15 Express Lanes Project Southern Extension (ELPSE)

RIVERSIDE COUNTY, CALIFORNIA
DISTRICT 8 – RIV-15 PM 20.3 TO PM 40.1
EA: RIV 08-0J0820 / ID: 08-18000063

Initial Site Assessment

Prepared for the
State of California Department of Transportation
in coordination with the Riverside County Transportation Commission

December 2021

15-RIV-08-PM 20.3 to PM 40.1

EA: RIV 08-0J0820

Traffic capacity and operational improvements would be constructed on Interstate 15 (I-15) between post miles (PM) 21.2 near Main Street in Lake Elsinore to PM 38.1 near El Cerrito Road in Corona. This area is referred to as the lane improvement limits. These lane improvements are located within Riverside County, California and run through the cities of Lake Elsinore, Corona and portions of unincorporated Riverside County including the Temescal Valley. Limits for the express lanes advance signage extend from PM 20.3 to PM 40.1 in Riverside County; these post miles constitute the overall Project limits.

Initial Site Assessment

Submitted Pursuant to: (State) Division 13, California Public Resources Code
(Federal) 42 U.S.C 4332(2)(C) and 49 U.S.C. 303

1 Summary

The Riverside County Transportation Commission (RCTC), in cooperation with the California Department of Transportation (Caltrans), is proposing to construct new lanes along Interstate 15 (I-15) between Post Mile (PM) 21.2 and PM 38.1 in Riverside County, California. The primary component of the I-15 Express Lanes Project Southern Extension (Project) would be the addition of two tolled express lanes¹ in both the northbound and southbound directions within the median of I-15 from State Route 74 (SR-74) (Central Avenue) (PM 22.3) in the City of Lake Elsinore, through the unincorporated Riverside County community of Temescal Valley, to El Cerrito Road (PM 38.1) in the City of Corona, for a distance of approximately 15.8 miles. The proposed Project would also add a southbound auxiliary lane between both the Main Street (PM 21.2) off-ramp and SR-74 (Central Avenue) on-ramp (approximately 0.75 mile), and the SR-74 (Central Avenue) off-ramp and Nichols Road on-ramp (PM 23.9) (approximately 1 mile).

Along with the lane additions, which would extend from PM 21.2 to 38.1, the proposed Project would include widening of up to 14 bridges, potential construction of noise barriers, retaining walls, drainage systems, and implementation of electronic toll collection equipment and signs. Associated improvements for the toll lanes, including advance signage and transition striping, would extend approximately 2 miles from each end of the express lane limits to PM 20.3 in the south and PM 40.1 in the north. The proposed lane additions and supporting infrastructure are expected to be constructed primarily within the existing State right of way.

This Initial Site Assessment (ISA) was prepared for the proposed Project in order to identify potential and known contaminant sources or recognized environmental conditions (REC), historical RECs (HREC), and controlled RECs (CREC), as defined in the American Society for Testing and Materials International, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-13 (ASTM International, Inc. 2013), or ASTM Standard. The ISA identifies facilities with documented or visible contamination or releases into the environment within the ISA Study Area. The ISA Study Area is defined as the area within the Project limits and a 300-foot buffer from the Project limits to account for adjoining properties.

Based on the review of federal, state, and local environmental databases, Sanborn® fire insurance maps, historical aerial photographs, historical topographic maps, available public agency records, and the observations during a field reconnaissance conducted on December 10, 11, and 14, 2020 and April 1, 2021, no RECs were identified within the ISA Study Area for the Project. However, the following environmental conditions were identified for the proposed Project and may be encountered during construction activities:

- Hazardous Material Sites within Project Limits – Although no open cases involving leaking underground storage tanks (LUST) or spills were identified within the Project limits, there is a potential for encountering unexpected or unknown contaminants during soil disturbance activities at six hazardous material sites, they are: Nichols Road / I-15 interchange (Site #32), Gavilon

¹ Express lanes are traffic lanes that are separated from general purpose lanes where users are charged a toll to use the lanes.

Wash Bridge (Site #34), Indian Truck Trail / I-15 interchange (Site #49), Temescal Canyon Road / I-15 interchange (Site #55), Coronita Ranch Sand Deposit (Site #76), and Cajalco Road / I-15 interchange (Site #78).

- Aerially Deposited Lead (ADL) – Soil within the Project limits, including the median, shoulders, and ramps, do not represent a significant environmental or health hazards and, according to the DTSC variance issued to Caltrans, can be classified as unregulated Type X soil, non-hazardous, and can be reused on site without restriction. Per the soil reuse agreement, a Lead Compliance Plan (LCP) is required for worker safety.
- Asbestos Containing Material (ACM) – ACM is present in the gray felt pad along the southbound (SB) and northbound (NB) Brown Canyon Wash Bridge and Weirick Road Undercrossing Bridge inner guard rails. In addition, there is a potential for all 14 bridges that require widening by the Project to contain ACMs in areas that have not been sampled.
- Lead-Based Paint (LBP) – LBP is present on the railing of NB Temescal Wash Bridge and in the yellow lane surface paint at NB Indian Wash Bridge. In addition, there is a potential for all 14 bridges that require widening by the Project to contain LBP in areas that have not been sampled.
- Treated Wood Waste (TWW) – Wooden guardrail posts may have been treated with creosote and pentachlorophenol (common wood preservatives).
- Paint and Thermoplastic Striping (PTS) – Yellow paint used for lane striping and pavement marking along I-15 within ROW may contain lead chromate.
- Construction Generated Hazardous Waste – Construction of the proposed Project may generate hazardous waste. Hazardous wastes generated during construction of the proposed Project would require disposal and could include used oil (not hazardous), sediment from vehicle washing, petroleum materials, cleaning solvents, and paint.

1.1 Recommendations

The scope of an ISA is limited to anecdotal and visual evidence of potential RECs and does not include verification of RECs based on Phase II soil and/or groundwater sampling. Based on the findings above, no RECs have been identified within the ISA Study Area; however, environmental conditions such as ADL, ACM, LPB, TWW, PTS, and construction generated hazardous waste have been identified and may be encountered during construction activities. These environmental conditions are not considered RECs, as they are not included in the ASTM process. Measures HW-1 through HW-8 are recommended to help protect worker health and safety, the public, and the environment. These measures would substantially reduce the likelihood of adverse effects related to temporary impacts associated with hazardous wastes and materials for the proposed Project.

HW-1 Asbestos Containing Materials and Lead-Based Paint. The Project would include the widening of 14 bridges. Asbestos containing materials (ACM) is present in the gray felt pad along the southbound and northbound Brown Canyon Wash Bridge and Weirick Road Undercrossing Bridge inner guard rails. In addition, lead-based paint (LBP) is present in the light gray paint on the railing of northbound Temescal Wash Bridge and in the yellow lane surface paint at northbound Indian Wash Bridge. ACM and LBP associated with these

bridges may be impacted by the Project. In addition, there is a potential for all 14 bridges to contain ACMs and LBP in areas that have not been sampled. The Riverside County Transportation Commission's (RCTC) resident engineer or designated contractor will ensure that ACM and LBP content will be sampled for all areas of the 14 affected bridges that will be disturbed by the Project during the Plans, Specifications, and Estimates phase, prior to any demolition or disturbance activities. RCTC's resident engineer or designated contractor will ensure that the survey will be conducted in conformance with the United States Environmental Protection Agency National Emission Standards for Hazardous Air Pollutants 40 Code of Federal Regulations (CFR), South Coast Air Quality Management District Rule 1403, and in accordance with Caltrans Standard Specifications, Section 14-11.13, Disturbance of Existing Paint Systems on Bridges, and Section 14-11.16, Asbestos-Containing Construction Materials in Bridges.

HW-2 Treated Wood Waste. Wooden guardrail posts may contain creosote and pentachlorophenol. During construction, RCTC's resident engineer or designated contractor will ensure that treated wood objects are handled as treated wood waste (TWW) and managed per Chapter 34, Title 22 California Code of Regulations Sections 67386.1 through 67386.12, "Alternative Management Standards for Treated Wood Waste," and in accordance with Caltrans Standard Specifications, Section 14-11.14 Treated Wood Waste. All TWW should be properly disposed at a landfill permitted to accept TWW.

HW-3 Paint and Thermoplastic Striping. Paint used for traffic striping and pavement marking may contain lead chromate. During construction, RCTC's resident engineer or designated contractor will ensure that sampling, analysis, removal, and disposal of any traffic striping and pavement materials will be completed in accordance with Construction Program Procedure Bulletin 99 2, and Caltrans Standard Specifications, Section 14-11.12. Removal of Yellow Traffic Stripe and Pavement Marking with Hazardous Waste Residue and Section 36-4 Residue Containing Lead from Paint and Thermoplastic (2018) and be consistent with the requirements within Caltrans Construction Manual, Chapter 7-107E Removing Yellow Traffic Stripe and Pavement Marking with Hazardous Waste Residue (2019). Before disposal, the contractor is required to sample the removed material for proper waste classification. Yellow traffic stripe and pavement marking that is characterized as hazardous waste requires disposal to a Department of Toxic Substances Control (DTSC) permitted Class I disposal facility.

HW-4 Construction Generated Hazardous Waste. Construction of the proposed Project may generate hazardous waste. Hazardous wastes generated during construction of the proposed Project would require disposal and could include used oil (not hazardous), sediment from vehicle washing, petroleum materials, cleaning solvents, and paint. RCTC's resident engineer or designated contractor will ensure that all hazardous waste generated during construction will be handled, stored, and disposed of in accordance with Caltrans Standard Specifications, Section 7-107A of the Construction Manual.

HW-5 Construction Health and Safety Plan. Prior to construction, RCTC's resident engineer or designated contractor will ensure the development of a Health and Safety Plan (HASP)

to guide all construction activities. A Certified Industrial Hygienist (CIH) will review this plan, based on evaluations of proposed construction activities, the potential hazards identified in this report, and any future assessment prepared for the Project. This plan will contain specific procedures for encountering expected and unexpected contaminants, including silica sand associated with the Coronita Ranch Sand Deposit site. It will prescribe safe work practices, contaminant monitoring, personal protective equipment, emergency response procedures, and safety training requirements to protect construction workers and third parties. The plan will meet the requirements of 29 CFR 1910 and 1926, and all other applicable Federal, State, and local regulations and requirements. The designated contractor will be responsible for preparing the HASP before the start of construction.

HW-6 Contaminated Media Management Plan. Prior to construction, RCTC's resident engineer or designated contractor will ensure the preparation of a Contaminated Media Management Plan (CMMP). This plan will include procedures for contaminant monitoring and identification, temporary storage, handling, treatment, and disposal of waste and materials (including soil), in accordance with applicable Federal, State, and local regulations and requirements. The designated contractor will be responsible for preparing the CMMP before the start of construction.

HW-7 Construction Contingency Plan. Prior to construction, RCTC's resident engineer will ensure the preparation of a Construction Contingency Plan (CCP), in accordance with the guidance provided in Chapter 7-107 of the Caltrans Construction Manual for handling and dealing with unknown hazards (see Appendix J for Caltrans Unknown Hazards Procedure). This plan will include provisions for responding to events such as the discovery of unidentified underground storage tanks (UST), hazardous materials, petroleum hydrocarbons, or hazardous or solid wastes during construction. This plan will address UST decommissioning, field screening, and material testing methods; mitigation and contaminant management requirements; and health and safety requirements for construction workers. If an unexpected release of hazardous substances is found in reportable quantities, the National Response Center must be notified by calling 1-800-4248802, and cleanup must be coordinated with environmental agencies. The designated contractor will be responsible for preparing the CCP before the start of construction.

HW-8 Lead Compliance Plan. Soil within the Caltrans right of way (ROW) of the Project limits, including the median, shoulders and ramps, were sampled for aerially deposited lead (ADL). The ADL survey classified the soil in these areas as unregulated Type X soil, which is non-hazardous and suitable for reuse on site without restriction, under the July 1, 2016, ADL Agreement between Caltrans and the DTSC. This ADL Agreement allows such soils to be safely reused within the Project limits, as long as all requirements of the ADL Agreement are met. Per the soil reuse agreement, a Lead Compliance Plan (LCP) is required for worker safety. Prior to construction, RCTC's resident engineer or designated contractor will ensure that a LCP is developed by a CIH, to protect workers from exposure to lead associated with ADL, as well as LBP, and traffic stripe and pavement makings. The LCP will include procedures for the handling, management, sampling, and disposal of material containing lead. ADL and LBP investigations and traffic striping removal are

separate tasks usually conducted by separate contractors, which each require a separate LCP.

This page is intentionally blank.

2 Introduction

2.1 Purpose of the Initial Site Assessment

An ISA was conducted for the Project located in Riverside County, California. The purpose of the ISA is to identify potential and known contaminant sources or RECs, HRECs, and CRECs, as defined in the ASTM International Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-13 (ASTM Standard), for the Project. The ISA identifies RECs that may affect the proposed Project. The ISA is a corridor-level ISA, which consists of an ISA Study Area that is defined as the area within the Project limits and a 300-foot buffer from the Project limits to account for adjoining properties.

The ISA was prepared in general accordance with ASTM Standard and Caltrans ISA procedures. The ISA was prepared using the following guidance documents:

- Caltrans Project Development Procedures Manual, Chapter 18 – Environmental Contamination (Caltrans 2006a)
- Caltrans Standard Environmental Reference (SER) Environmental Handbook, Volume 1, Chapter 10, Hazardous Materials, Hazardous Waste, and Contamination (Caltrans 2014)
- Caltrans ISA Guidance Document (Caltrans 2006b)
- Applicable sections of the ASTM Standard
- Applicable sections of Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312)
- California Public Resources Code Section 21092.6

The following terms used in this ISA are defined in the ASTM Standard, as follows:

- RECs are defined as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not RECs.”
- HRECs are defined as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.”
- CRECs are defined as “a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.”
- *De minimis* condition generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of

appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not RECs or CRECs.

2.1.1 Scope of Work

The following tasks were conducted for the ISA:

- Preparation of Caltrans ISA checklist (Appendix A)
- Review of federal, state, and local environmental databases
- Review of Sanborn® fire insurance maps
- Review of historical aerial photographs
- Review of historical topographic maps
- Field reconnaissance
- Review of public agency records available on the State Water Resources Control Board (SWRCB) GeoTracker database, Department of Toxic Substances Control (DTSC) EnviroStor database, and in the EDR Area/Corridor Report.

2.1.2 Significant Assumptions

This ISA was conducted in general accordance with the Caltrans ISA guidance documents and ASTM E1527-13 to the extent deemed appropriate. It was prepared to identify and analyze environmental conditions that constitute existing, past, or potential environmental risks associated with the site. Performance in accordance with these standards is intended to reduce, but not eliminate, uncertainty with respect to the potential for RECs associated with the site.

2.1.3 Limitations

An ISA is a screening study conducted to identify potential RECs that may affect construction of the proposed Project and determine the appropriate level of any subsequent studies that may be required. The ISA was prepared in general accordance with ASTM Standard and Caltrans ISA procedures. This assessment does not provide a definitive determination of the actual presence or absence of contamination and would not meet “innocent landowner” provisions under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), which establish a defense for the purchase of real property.

This report is based on a limited review of site data. According to Volume 1, Chapter 10 – Hazardous Materials, Hazardous Waste, and Contamination of the Caltrans SER Environmental Handbook (last updated August 27, 2014), this ISA, including but not limited to the environmental database search per ASTM E1527-13, field reconnaissance, and agency records review, should be updated if the report is over one year old, unless it is directed otherwise by Caltrans. In some cases, Caltrans may request that a supplemental memorandum to document updated database information be provided to update the approved ISA.

This ISA does not guarantee, imply, or assert that all potential contaminated sources have been located. Contamination may have occurred without being documented. Conditions within the disturbance limits of the proposed Project could change and should be reevaluated during final design and whenever new information becomes available.

This page is intentionally blank.

3 Project Description

RCTC, in cooperation with the Caltrans, is proposing to construct new lanes along I-15 between PM 21.2 and PM 38.1 in Riverside County, California. The primary component of the Project would be the addition of two tolled express lanes² in both the northbound and southbound directions within the median of I-15 from SR-74 (Central Avenue) (PM 22.3) in the City of Lake Elsinore, through the unincorporated Riverside County community of Temescal Valley, to El Cerrito Road (PM 38.1) in the City of Corona, for a distance of approximately 15.8 miles. The proposed Project would also add a southbound auxiliary lane between both the Main Street (PM 21.2) off-ramp and SR-74 (Central Avenue) on-ramp (approximately 0.75 mile), and the SR-74 (Central Avenue) off-ramp and Nichols Road on-ramp (PM 23.9) (approximately 1 mile).

Along with the lane additions, which would extend from PM 21.2 to 38.1, the proposed Project would include widening of up to 14 bridges, potential construction of noise barriers, retaining walls, drainage systems, and implementation of electronic toll collection equipment and signs. In addition, due to the southbound express lanes access between the Cajalco Road and Weirick Road interchanges, the southbound I-15 Weirick Road off-ramp would be configured as a dual lane exit. Associated improvements for the toll lanes, including advance signage and transition striping, would extend approximately 2 miles from each end of the express lane limits to PM 20.3 in the south and PM 40.1 in the north. The proposed lane additions and supporting infrastructure are expected to be constructed primarily within the existing State right of way. This Project is included in the 2019 Federal Transportation Improvement Program (FTIP) as Project ID RIV170901. It is also included in the Southern California Association of Governments' (SCAG) *Connect SoCal* 2020–2045 Regional Transportation Plan (RTP)/Sustainable Communities Strategy (SCS) as Project ID 3160001.

The FTIP and RTP listings for this Project were amended in April 2021 to accurately reflect the scope and limits of the Project as currently proposed. The amended FTIP and RTP listings will state the following:

IN WESTERN RIVERSIDE COUNTY - ON I-15, ADD 2 EXPRESS LANES IN EACH DIRECTION, GENERALLY IN THE MEDIAN, FROM SR-74 (CENTRAL AVENUE) (PM 22.3) IN THE CITY OF LAKE ELSINORE TO EL CERRITO ROAD (PM 38.1) IN THE CITY OF CORONA. CONSTRUCT SOUTHBOUND AUXILIARY LANE FROM MAIN STREET (PM 21.2) TO SR-74 (CENTRAL AVENUE) (PM 22.3) AND FROM SR-74 (CENTRAL AVENUE) (PM 22.3) TO NICHOLS ROAD (PM 23.9). SIGNAGE AND TRANSITION STRIPING EXTENDS TO PM 20.3 TO THE SOUTH AND PM 40.1 TO THE NORTH.

² Express lanes are traffic lanes that are separated from general purpose lanes where users are charged a toll to use the lanes.

3.1 Alternatives

Two alternatives are being evaluated as part of the Project, a Build Alternative and a No-Build Alternative. The Build Alternative was designed to satisfy the Project purpose and need, while avoiding and/or minimizing environmental impacts.

3.1.1 Build Alternative

The proposed Project includes construction of two tolled express lanes in each direction on I-15 in Riverside County between PM 21.2 and PM 38.1. The proposed Project would be constructed within the existing ROW. The tolled express lanes would be used by vehicles for a toll and would also serve as high-occupancy vehicle (HOV) lanes for HOV 3+ users for a reduced toll. The toll rate would be adjusted based on congestion. These improvements would enhance regional mobility and offer greater user flexibility of the regional transportation system. Sign modifications and the installation of new signs would also be included to support the new tolled express lanes. Advanced signage is required to be posted a minimum of two miles prior to the start of the tolled express lanes. Signage will be located within the Project limits between PM 20.3 and PM 40.1. The Build Alternative would not add any new connections and will not improve any existing ramps.

Construction Soil Disturbance Activities

Based on the current Project construction plans, the following soil disturbance activities and depth of excavation activities are anticipated for the proposed Project:

- Median paving to accommodate the Express Lanes from just north of Cajalco Road to the SR-74 (Central Avenue) Interchange (up to 8 feet excavation).
- Outside widening to accommodate the following (up to 8 feet excavation):
 - SB auxiliary lane between Cajalco Road and Weirick Road.
 - SB trap lane (minor widening) approaching Nichols Road.
 - SB auxiliary lane between Nichols Road and SR-74 (Central Avenue).
 - SB auxiliary lane between SR-74 (Central Avenue) and Main Street.
- Median barrier to separate the NB and SB I-15 roadbeds. This barrier has portions that are at grade (both NB and SB at same grade), portions that utilize a standard grade separated barrier (roadbeds where the difference is less than 36 inches) and portions that will require a barrier on top of a retaining wall (greater than 36 inches of separation) (from 8 feet to 12 feet of excavation).
- Sign structures in the median to accommodate Express Lanes signage (pile foundations up to 32 feet deep).
- Bridge structure foundation and columns:
 - Gavilan Wash (56-0726R/L) – widen right and left bridges inside to median (vertical and battered piles driven to a depth of approximately 40 feet).

- Lake Street Undercrossing (56-0682R/L) – widen right and left bridges inside to median (7 feet excavation depth down to bottom of spread footings).
- Temescal Canyon Road Undercrossing (56-0681R/L) – widen right and left bridges inside to median (vertical piles driven to a depth of approximately 55 feet).
- Temescal Wash (56-0680R/L) – widen right and left bridges inside to median (vertical piles driven to a depth of approximately 68 feet).
- Horsethief Canyon Road Undercrossing (56-0679R/L) – widen right and left bridges inside to median (10 feet excavation depth down to bottom of spread footings).
- Horsethief Canyon Wash (56-0678R/L) – widen right and left bridges inside to median (vertical piles driven to a depth of approximately 60 feet).
- Indian Wash (56-0677R/L) – widen right and left bridges inside to median (vertical piles driven to a depth of approximately 57 feet).
- Indian Truck Trail Road Undercrossing (56-0676R/L) – widen right and left bridges inside to median – this bridge features existing tie-back walls that will need to be de-tensioned and reconstructed with new tie-backs installed (vertical piles driven to a depth of approximately 60 feet).
- Temescal Canyon Road Undercrossing (56-0675R/L) – widen right and left bridges inside to median (vertical piles driven to a depth of approximately 75 feet).
- Mayhew Wash (56-0674R/L) – widen right and left bridges inside to median (vertical piles driven to a depth of approximately 72 feet).
- Coldwater Wash (56-0543R/L) – widen right and left bridges inside to median (40 feet excavation depth down to bottom of spread footings, and vertical piles at abutments driven to a depth of approximately 54 feet).
- Temescal Canyon Road Undercrossing (56-0542R/L) – widen right and left bridges inside to median (10 feet excavation depth down to bottom of spread footings).
- Brown Canyon Wash (56-0559R/L) – widen right and left bridges inside to median (vertical piles driven to a depth of approximately 79 feet).
- Weirick Road Undercrossing (56-0541R/L) – widen right and left bridges inside to median (14 feet excavation depth down to bottom of spread footings).
- Two retaining walls between Cajalco Road and Weirick Road along SB I-15 roadbed – these are anticipated to be a combination ground anchor wall and soldier pile wall (early estimates have this up to 60 feet into the existing slope and 45 feet deep below bottom of new wall).
- Drainage improvements – miscellaneous throughout corridor with new system connections to existing drainage pipes (potential connections up to 25 feet deep – most deeper connections anticipated in median areas).
- Treatment Best Management Practices – in process of being identified – anticipated in existing interchange infield areas or in dirt areas along I-15 mainline (up to 15 feet in excavation).

- Soundwalls – to be determined.
- Electrical/communication facilities and vaults – to be determined.
- Utility relocations – to be determined.

3.1.2 No-Build Alternative

Under the No-Build Alternative, the I-15 ELPSE would not be constructed. This alternative does not meet the Project purpose and need; however, it would not preclude the construction of future improvements or general maintenance activities. Even without construction of the proposed I-15 ELPSE, limited improvements on I-15 associated with the approved I-15 ELP are being constructed for opening in 2021. Describing and analyzing a No-Build Alternative helps both decision-makers and the public to compare the impacts of approving the proposed Project with the consequences of not approving the proposed Project.

This page is intentionally blank.

4 Purpose and Need

4.1 Project Purpose

The purpose of the proposed Project is to:

- Improve and manage traffic operations, congestion, and travel times along the corridor
- Expand travel mode choice along the corridor
- Provide an option for travel time reliability
- Provide a cost-effective mobility solution
- Expand and maintain compatibility with the express lane network in the region

4.2 Project Need

Existing traffic volumes often exceed current highway capacity along several segments of I-15 between SR-74 (Central Avenue) and El Cerrito Road. Due to forecasted population growth and the continued development to support the projected growth in the region, the I-15 corridor is expected to continue to experience increased congestion and longer commute times that are projected to negatively affect traffic operations along the freeway mainline.

The adopted SCAG 2016 RTP Growth Forecast estimates a 36.7-percent increase in population in Riverside County between 2015 and 2040. SCAG's recently adopted *Connect SoCal* (2020–2045 RTP/SCS) Growth Forecast estimates a 38.3-percent increase in population in Riverside County between 2020 and 2045, with the number of households and employment increasing by approximately 30.5 percent and 34.02 percent, respectively. In the City of Corona, the 2020–2045 RTP/SCS Growth Forecast estimates an 11.6-percent increase in population from 2016 to 2045 and an 11.7-percent increase in households. According to the same source, the City of Lake Elsinore is projected to see a 76.8-percent increase in population. This projected growth is expected to place a high demand on existing transportation facilities and services.

Currently, north-south mobility options for motorists are limited through this portion of Riverside County. Besides local streets, the only parallel route for motorists is Interstate 215, which is over 10 miles east of I-15 and generally serves a different region within Riverside County. As demonstrated in the traffic analyses performed for the project, northbound I-15 currently operates at an unacceptable level of service (LOS)³ (i.e., LOS E or F) during the AM and/or PM peak hour along 6 out of the 15 segments evaluated between the Cajalco Road off-ramp and the Indian Truck Trail on-ramp. This is projected to climb to 8 of 18 segments evaluated by 2030 between the El Cerrito Road on-ramp and the Indian Truck Trail on-ramp,

³ The ability of a highway to accommodate traffic is typically measured in terms of LOS. Traffic flow is classified by LOS, ranging from LOS A (traffic is free flowing, with low volumes and high speeds) to LOS F (traffic volume exceeds design capacity, with forced flow and substantial delays). The LOS for signalized and unsignalized intersections is based on delay time per vehicle.

and to 19 of 20 locations evaluated within the project limits by 2050. Southbound I-15 currently operates at an unacceptable LOS (i.e., LOS E or F) during the AM and/or PM peak periods at 3 of 15 mainline segment locations evaluated between the El Cerrito Road off-ramp and the Weirick Road/Dos Lagos Drive off-ramp. This is projected to increase to five locations by 2030, and then decrease to four locations by 2050, also between the El Cerrito Road off-ramp and the Weirick Road/Dos Lagos Drive off-ramp.

The expected increase in congestion during peak periods and worsening traffic conditions, particularly during AM and PM peak periods, are expected to result in additional local and regional traffic congestion. Existing heavy peak-period congestion and traffic delays, as evidenced by the poor LOS, are expected to continue to negatively affect traffic operations along mainline I-15.

Based on the traffic analyses performed, along both northbound and southbound I-15 vehicle volume served is projected to continue to increase during the AM and PM peak periods from the existing year through 2050, as is the total distance traveled. In addition, the total travel time during the PM peak period in particular is anticipated to more than double by the Design Year (2050), with total travel time during the PM peak period forecasted to rise by 167-percent compared to the existing (2019) travel time condition. Furthermore, average delay per vehicle and total delay are projected to increase from Existing Year (2019) to Design Year (2050) during the AM and PM peak periods, at least tripling on both northbound and southbound I-15 during this timeframe.

Under Existing Conditions (2019) average speeds for northbound and southbound I-15 during the AM and PM peak hours are projected to decrease between the Existing Conditions (2019) and Design Year (2050) in all instances except during the PM peak hour in the southbound direction. These projected reductions are most pronounced on northbound I-15, ranging from a reduction of 25.5 miles per hour (mph) to 52.6 mph. The projected average delay per vehicle during this same period is expected to increase, with the northbound I-15 delay projected to increase from 774 seconds and 102 seconds during the AM and PM peak hours, respectively, under Existing Conditions (2019), to 3,828 seconds and 6,224 seconds during the AM and PM peak hours, respectively, in the Design Year (2050).

Based on the above existing and forecasted traffic data, recurring daily congestion due to continuing population growth, development, and travel demand exceeding available highway capacity is expected to continue to result in slower travel speeds, reduced throughput, and increased travel times along mainline I-15.

5 Site Description

5.1 Site Location

The Project is located along I-15 between PM 20.3 and PM 40.1 in Riverside County, California (Figure 3-1 and Figure 3-2). Improvements proposed consist of new toll lanes along I-15 between PM 21.2 and PM 38.1. Associated improvements for the toll lanes, including advance signage and transition striping, would extend approximately two miles from each end of the express lane limits to PM 20.3 in the south and PM 40.1 in the north. The Project is located within the existing Caltrans ROW. The land use within the Project limits primarily consist of transportation and vacant uses. Land uses located adjacent to the Project limits consist of agricultural, commercial, residential, manufacturing/industrial, light industrial, and mining uses.

5.2 Environmental Setting

This section is based on the *Location Hydraulic Study* (MBI 2021) that was prepared for the proposed Project.

5.2.1 Topography / Soil Erosion Potential

The existing topography within the Project limits generally slopes from its southeast extent to its northwest extent. At the southern extent of the Project limits along I-15, the elevation is approximately 1,320 feet near the SR-74 interchange overpass and decreases to approximately 900 feet at the northern extent of the Project limits. Soils within the Project limits are characterized by high infiltration capacity with gravelly and sandy loam. Most of the soil is sloped and well drained.

5.2.2 Surface Water Channels

The Project crosses over multiple channels, six of which have floodplains directly impacted by the proposed Project: Arroyo Del Toro, Stovepipe Canyon Wash, Temescal Wash, Mayhew Wash, Coldwater Wash, and Bedford Wash. These channels are tributary to Temescal Wash, which is conveyed to the Santa Ana River and ultimately to the Pacific Ocean and are further discussed below. There are several other channels in the vicinity that do not cross over the Project limits but are tributary to these channels.

Arroyo Del Toro

East of the proposed Project, Arroyo Del Toro is an engineered concrete rectangular channel that crosses Dexter Avenue through a quintuple 14-foot by 9.5-foot RCB. The RCB's outlet into a detention basin between Dexter Avenue and the I-15 Northbound roadway. From the detention basin, ten 36-inch and five 48-inch culverts convey the flow under the I-15, to a rectangular concrete channel parallel to the I-15 Southbound roadway. From the concrete channel, Arroyo Del Toro outlets into Collier Marsh within Temescal Wash. The portion of Arroyo Del Toro within the Project limits (PM 22.60) is in a 1% Annual Chance SFHA Zone A (FEMA Panel 06065C2029G).

Stovepipe Canyon Wash

Stovepipe Canyon Wash originates north of I-15 above Temescal Canyon High School. The stream moves south towards I-15 via natural channel. A 14 -feet by 7-feet reinforced concrete box (RCB) conveys the stream across the I-15 and then the culvert ultimately confluences with Temescal Wash. Stovepipe Canyon Wash is tributary to Temescal Wash. The portion of Stovepipe Canyon Wash within the Project limits (PM 23.50) is in a 1% Annual Chance SFHA Zone AO and 0.2% Annual Chance Flood Hazard Zone X (FEMA FIRM Panels 06065C2028G).

Temescal Wash

Temescal Wash originates at Lake Elsinore as an emergency outlet for large storm events, occurring only once every 15 years. From the origin, Temescal Wash flows northwest through Temescal Valley and north towards Corona where it reaches a floodplain and confluences with the Santa Ana River. The portion of Temescal Wash (Reach 4) within the Project limits (PM 28.04) lies within a 1% Annual Chance SFHA Zone AE and is classified as a regulatory floodway (FEMA FIRM Panel 06065C2006G). The area surrounding the channel and the SFHA Zone AE are 0.2% Annual Chance Flood Hazard Zone X (FEMA FIRM Panels: 06065C1360G, 06065C1390G, 06065C2005G, 06065C2006G, 06065C2007G, 06065C2026G, 060652028G, and 06065C2029G).

Mayhew Wash

Mayhew Wash originates north of Temescal Canyon Road west of I-15. From the origin Mayhew Wash flows east towards and underneath I-15 via natural channel. After it crosses I-15, the channel crosses under Mayhew road and crosses through a floodplain, where it eventually confluences with Temescal Wash. Mayhew Wash is tributary to Temescal Wash. The portion of Mayhew Wash within the Project limits (PM 31.97) lies in a Zone X region. The outlet of the channel onto Temescal Wash is a 1% Annual Chance SFHA Zone AE (FEMA FIRM Panel 06065C1390G).

Coldwater Wash

Coldwater Wash originates southwest of I-15 within Coldwater Canyon off Clay Canyon Drive. From the origin Coldwater Wash flows north via natural channel. After it crosses I-15, the channel travels west adjacent to Temescal Canyon Road and north along Dawson Canyon Road until it reaches Temescal Wash. Coldwater Wash is tributary to the Temescal Wash. The Temescal Wash is tributary to the Santa Ana River. The portion of Coldwater Wash within the Project limits (PM 32.96) lies in a Zone X region. The outlet of the channel onto Temescal Wash is a 1% Annual Chance SFHA Zone AE (FEMA FIRM Panel 06065C1390G).

Bedford Wash

Bedford Wash originates south of I-15 at the base of the Santa Ana Mountains. From the origin Bedford Wash flows north easterly via natural channel and improved channels of various heights and widths. Bedford Wash confluences with a regulatory floodway leading to Temescal Canyon Lake. The portion of Bedford Wash within the Project limits (PM 36.58) is designated as a 1% Annual Chance Special Flood Hazard Area (SFHA) Zone A (Federal Emergency Management Agency Flood Insurance Rate Map [FEMA FIRM] Panel 06065C1360G).

5.2.3 Hydrogeology

The Project limits are located within the Elsinore – Elsinore Valley Groundwater Basins (8-004.01), Elsinore – Bedford-Coldwater (8-004.02), and Upper Santa Ana Valley – Temescal (8-002.09).

Elsinore Valley Subbasin

The Elsinore Valley Subbasin is located within the Elsinore Groundwater Basin and it covers approximately 40 square miles. It is bounded on the east by consolidated rocks of the Gavilan Plateau and Estelle Mountain, and is bound on the south by the Elsinore watershed boundary. Per the California Department of Water Resources Water Data Library, the nearest groundwater well with current groundwater level data is located approximately 1.6 miles south of the Project. Moreover, it is an observation well that is operated by the Elsinore Valley Municipal Water District and located on Wisconsin Street in the City of Lake Elsinore, between Lakeshore Drive to the north and Lehr Drive to the east. The depth to groundwater in November 2019 was approximately 299 feet (California Department of Water Resources, 2020). Groundwater flows towards the center of the Subbasin.

Bedford – Coldwater Subbasin

The Bedford – Coldwater Subbasin is located within the Elsinore Groundwater Basin and it covers approximately 11 square miles. It is bounded on the northwest by Temescal Subbasin, with a groundwater divide near Bedford Wash, is bounded on the east and west by consolidated rocks of Estelle Mountain and the Santa Ana mountains, and is bound on the south by the jurisdictional boundary of the Elsinore Valley Subbasin. Per the California Department of Water Resources Water Data Library, the nearest groundwater well with current groundwater level data is located approximately 0.3 miles east of the Project. It is an Irrigation well that is operated by the Temescal Valley Water District and located adjacent to Leroy Road in the Temescal Valley. The depth to groundwater in April 2020 was approximately 32 feet (California Department of Water Resources, 2020). Groundwater flows towards the center and northwest of the Subbasin.

Upper Santa Ana Valley Subbasin

The Upper Santa Ana Valley Subbasin is located within the Temescal Groundwater Basin and it covers approximately 36 square miles. It is bounded on the north by the Chino Subbasin, separated by low hills of crystalline rock near Norco and the Santa Ana River. The east side of the Subbasin is bounded by non-water bearing crystalline rocks of the El Sobrante de San Jacinto and La Sierra Hills, and the west is bounded by the Santa Ana mountains. The south is bounded by the Elsinore Basin at a constriction of alluvium of Temescal Wash. Per the California Department of Water Resources Water Data Library, the nearest groundwater well with current groundwater level data is located approximately 3.5 miles north of the start of the Project. It is an observation well that is operated by Elsinore Valley Municipal Water District and located on the corner of Tenth Street and Lincoln Avenue in the City of Corona. The depth of groundwater in April 2020 was approximately 196 feet (California Department of Water Resources, 2020). Groundwater typically flows towards the center of the Subbasin and then northeast towards the Santa Ana River.

This page is intentionally blank.

6 Methodology

6.1 Initial Site Assessment Study Area

For the purposes of this ISA, the ISA Study Area is defined as the area within the Project limits and a 300-foot buffer from the Project limits to account for adjoining properties.

6.2 Task 1 – Environmental Database Search

An environmental database search was conducted by using Environmental Data Resources (EDR) to gather government database records dated November 12, 2020. The search consisted of reviewing existing federal, state, local, tribal, and EDR proprietary environmental databases, per the ASTM Standard. The EDR Area/Corridor Report (EDR 2020a) was prepared specifically for the proposed Project. EDR stated that its report contains “certain information obtained from a variety of public and other sources reasonably available to EDR. It cannot be concluded from this EDR report that coverage information for the target and surrounding properties does not exist from other sources.” EDR searched all available databases relevant to hazardous waste and materials within the Project limits and its surroundings, but it is important to note that sites appear in these databases only if proper reports are made and recorded.

The purpose of the database review was to identify sites or areas that may be a concern based on the database listing and a search distance criterion. The search distance criteria for each database accessed (where available) is provided by EDR but may be reduced to consider only the Project limits, adjoining properties, and the search distance criteria provided by ASTM E1527-13.

A list of the databases that were searched by EDR and details for the reduction in search distance can be found in Table 6-1.

Table 6-1. Regulatory Databases and Search Distances

Database	EDR Search Distance per ASTM Standard	ISA Search Distance	Justification for Reduction from ASTM Standard Search Distance

ASTM=ASTM International; EDR=Environmental Data Resources; and ISA=Initial Site Assessment.

A copy of the database search, which includes definitions for the above-referenced databases, is included in Appendix B.

6.3 Task 2 – Review of Historical Land Use Records

6.3.1 Historical Land Use

An evaluation of properties within the ISA Study Area was conducted to analyze historic land uses and changes to identify potential historical contaminant sources that may adversely impact the Project. Historical land use sources that were reviewed are:

- Sanborn® Fire Insurance Maps (1928, 1942, and 1960)
- Historical Aerial Maps (1931, 1938, 1948, 1949, 1953, 1961, 1966, 1967, 1975, 1978, 1985, 1989-1990, 1995, 2002, 2005, 2009, 2012, and 2016)
- Historical Topographic Maps (1901, 1942, 1947, 1953-1954, 1967, 1973, 1978, 1982, 1988, 1997, and 2012)

6.3.2 User-Provided Reports

A review of the I-15 ELPSE Aerially Deposited Lead Analysis (EA 08-0J0820) (Leighton 2021) and the I-15 ELPSE Limited Asbestos and Lead Chip Assessment (EA 08-0J0820) (A-Tech 2020) were conducted as part of this ISA.

6.4 Task 3 – Field Reconnaissance

A field reconnaissance was conducted on December 10, 11, and 14, 2020 and April 1, 2021 for the ISA Study Area, based on the results of the EDR database search that met the criteria listed in Section 6.2. The field reconnaissance was conducted from the public ROW and other publicly accessible areas, when feasible. Information was recorded regarding the Project location, the general condition of the ISA Study Area, and other observed conditions that might indicate a potential environmental concern. The field reconnaissance also included observation for utilities and transformers located within the ISA Study Area.

6.5 Task 4 – Agency Records Review

Following the review of information from the EDR database search (EDR 2020a), sites of concern were narrowed down based on the review of historical land use information, regulatory information (i.e. database listing type indicating release incidents or site restrictions), the distance from the Project limits, and the information gathered during the field reconnaissance. A regulatory agency file review was then conducted for the remaining sites of concern where more information was needed to develop a better understanding of potential contaminant sources that could impact the Project limits. The agency files were reviewed for the most recent site status information and the nature and extent of contamination, as well as pertinent land uses, geologic, hydrogeologic, and other information that may be used to assess potential impacts on the Project.

Files maintained by the SWRCB GeoTracker database and the DTSC EnviroStor database, and the EDR Radius Report were reviewed in February and March 2021. Information on the SWRCB GeoTracker and DTSC EnviroStor, databases are provided below.

6.5.1 State Water Resources Control Board GeoTracker Database

The SWRCB GeoTracker database is an environmental database search engine that tracks regulatory data about underground fuel tanks, fuel pipelines, and public drinking water supplies.

<https://geotracker.waterboards.ca.gov/>

6.5.2 Department of Toxic Substances Control EnviroStor Database

The DTSC EnviroStor database is an online search and geographic information system tool used for identifying Federal Superfund sites (i.e. National Priorities List), state response sites (including military, state Superfund, voluntary cleanup, and school sites), and permitted and corrective action facilities.

<https://www.envirostor.dtsc.ca.gov/public/>

6.6 Task 5 – Data Analysis and Report Preparation

Potential contaminant sources identified during Tasks 1 through 4 were screened to determine their potential impact on the proposed Project based on the following criteria:

- The occurrence of a documented release, based on either public records or physical observation
- The physical, chemical, and toxicological characteristics of suspected contaminants released from potential sources and the media potentially affected (soil, water, and air)

- Distance from the Project limits
- Nature of proposed design and construction activities in relation to the location and possible impact from a potential contaminant source
- Estimated groundwater flow direction and depth

These criteria were used to eliminate potential sources that are unlikely to present an impact on the proposed Project. Potential contaminant sources not eliminated during this screening process are recommended for further evaluation.

This page is intentionally blank.

7 Affected Environment

7.1 Environmental Database Review

The results of the EDR database search identified 129 sites that met the criteria listed in Table 6-1. Of the 129 sites, eight sites identified in the EDR database are within the Project limits. Table 7-1 lists the 129 sites and includes the site name, site address, distance/direction from the Project limits, and the database where the site was referenced. The sites listed in Table 7-1 are organized based on location from south to north and west to east along I-15. Maps showing the location of each site are included in Appendix C. A copy of the EDR Area/Corridor Report is provided in Appendix B.

Notes:

^aRefer to Appendix C for maps showing the location of each site.

^bAcronyms and abbreviations are defined in the EDR Area/Corridor Report (Appendix B).

7.1.1 Unmapped Properties

The EDR Area/Corridor Report includes an Orphan Summary (unmappable sites due to insufficient address information). A review of the Orphan Summary identified no listings of concern to the Project.

7.2 Review of Historical Land Use Records

7.2.1 Historical Land Use

Available historical information was reviewed to ascertain the historical uses within and adjoining to the Project limits. Review references primarily were the Sanborn[®] fire insurance maps, historical aerial photographs, and topographic maps.

Sanborn[®] Fire Insurance Maps

Sanborn[®] fire insurance maps were primarily produced in the early part of the twentieth century and were only prepared for developed areas where insurable structures were present. Sanborn[®] fire insurance maps can provide information pertaining to historical land use, storage location of hazardous materials, and facility operations. Sanborn[®] fire insurance maps were reviewed for the years of 1928, 1942, and 1960, detailed below, and are provided in Appendix D.

Table 7-2. Summary of Sanborn® Fire Insurance Maps

Year	Land Use Description
1928	Charters-Davis Co. / Lemon Packing Hq. was previously located where the Sam's Club Fuel Station (1395 E. Ontario Avenue, Corona) is currently located. No hazardous materials were noted to be stored onsite.
1942	R.H. Verity Sons & Co. / Lemon & Orange Packing Hq. was previously located where the Sam's Club Fuel Station (1395 E. Ontario Avenue, Corona) is currently located. No hazardous materials were noted to be stored onsite.
1960	The ISA Study Area was unchanged from the 1942 Sanborn® fire insurance map.

Historical Aerial Photographs

Historical aerial photographs were reviewed to assist in the identification of historical land use and document the general development of the Project limits and adjoining properties. Historical aerial photographs of the Project limits and adjoining properties were reviewed for the years of 1931, 1938, 1948, 1949, 1953, 1961, 1966, 1967, 1975, 1978, 1985, 1989-1990, 1995, 2002, 2005, 2009, 2012, and 2016, detailed below, and are provided in Appendix E.

Table 7-3. Summary of Historical Aerial Photographs

Year	Land Use Description
1931	The ISA Study Area consisted primarily of agricultural and undeveloped land uses. There are some scattered buildings associated with residential and agricultural land uses located within the ISA Study Area. Multiple water channels crossed the ISA Study Area, including Bedford Wash. Temescal Canyon Road had been constructed in roughly its current location running parallel to the existing I-15. One quarry site was located within the ISA Study Area that extended east from the Project limits to the existing intersection of Bel Air Street / State Street in the City of Corona. Another quarry site was located adjacent to the ISA Study Area, approximately 1,000 feet northeast from the existing intersection of I-15 / Old Temescal Road in the City of Corona. No evidence of mining activities was seen to occur within the ISA Study Area, including any fill or trenching.
1938	The ISA Study Area was generally unchanged from the 1931 photograph. Railroad tracks crossed the ISA Study Area at multiple locations, including at the existing intersection I-15 / Temescal Canyon Road.
1948	The ISA Study Area was generally unchanged from the 1938 photograph. A mining site was located where The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) is currently located, and Temescal Wash. The mining site included water tanks and tailing ponds. No evidence of mining activities was seen to occur within the ISA Study Area, including any fill or trenching.

Table 7-3. Summary of Historical Aerial Photographs

Year	Land Use Description
1949	Approximately twenty ASTs were located where Pacific Clay Products (26800 Bernard Street, Lake Elsinore, CA) is currently located. The ASTs were located within 0.25 mile south of the existing I-15.
1953	The ISA Study Area was generally unchanged from the 1949 photograph.
1961	I-15 had been constructed south of the existing intersection of I-15 / Temescal Canyon Road and included the I-15/SR-74 (Central Avenue) interchange. The mining site where The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) is currently located had expanded west of Temescal Canyon Road where a large area had been graded with a pond. An additional mining site was located northeast outside of the ISA Study Area where the Crossings at Corona (2470 Tuscany Street, Corona, CA) is currently located and had included nine tanks.
1966	I-15 had been constructed and paved from approximately the existing intersection of I-15 / Weirick Road to I-15 / Ontario Avenue. An industrial site with large buildings is located within the ISA Study Area where the existing Clay Company property (22709 Knabe Road, Corona, CA) is currently located. A pond had been established at the mining site located northeast of the ISA Study Area where the Crossings at Corona (2470 Tuscany Street, Corona, CA) is currently located.
1967	A mining site was located adjacent to the ISA Study Area, east of I-15, near the existing LATRICRETE property (22740 Temescal Canyon Road, Corona, CA). No evidence of mining activities was seen to occur within the ISA Study Area, including any fill or trenching.
1975	The quarry site previously seen within the ISA Study Area that extended east from the Project limits to the existing intersection of Bel Air Street / State Street in the City of Corona, as identified in the 1931 photograph, had been removed. Additional mining activities were conducted west of Temescal Canyon Road where The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) is currently located. Two ponds were also located in this same area. The additional mining area is adjacent to the Project limits. An additional tank had been installed at the mining site located northeast of the ISA Study Area where the Crossings at Corona (2470 Tuscany Street, Corona, CA) is currently located, bringing the total number of tanks at the site to ten.
1978	The ISA Study Area was generally unchanged from the 1975 photograph.
1985	I-15 had been fairly built throughout the ISA Study Area. Urban development had increased on both sides of I-15. A road had been paved through a mining site near the existing LATRICRETE property (22740 Temescal Canyon Road, Corona, CA) that was previously identified in the 1967 photograph. Ponds at both mining sites located at the

Table 7-3. Summary of Historical Aerial Photographs

Year	Land Use Description
	existing The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) and the Crossings at Corona (2470 Tuscany Street, Corona, CA) had been expanded.
1989-1990	The quarry site previously seen adjacent to the ISA Study Area, approximately 1,000 feet northeast from the existing intersection of I-15 / Old Temescal Road in the City of Corona, as identified in the 1931 photograph, was now surrounded by residential properties.
1990	The ISA Study Area was generally unchanged from the 1989-1990 photograph.
1995	The ISA Study Area was generally unchanged from the 1990 photograph, with the exception of less agricultural land uses and more urban development adjacent to the ISA Study Area.
2002	The mining site located northeast of the ISA Study Area where the Crossings at Corona (2470 Tuscany Street, Corona, CA) is currently located had been demolished and the site graded. All tanks had been removed; however, the pond located north of Tom Barnes Street had remained.
2005	The mining site where The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) is currently located had been demolished and the site graded. All tanks and ponds had been removed. The Crossings at Corona (2470 Tuscany Street, Corona, CA) had been partially constructed to its current configuration. The pond north of Tom Barnes Street had been removed and the site graded.
2009	The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) had been partially constructed to its current configuration. The Crossings at Corona (2470 Tuscany Street, Corona, CA) had been constructed to its current configuration. The site north of Tom Barnes Street had been excavated and included a ponding site.
2012	The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) had been constructed to its current configuration. The pond located north of Tom Barnes Street had been expanded.
2016	The ISA Study Area was generally unchanged from the 2012 photograph with the exception of the pond located north of Tom Barnes Street that had been filled and the site graded.

Historical Topographic Maps

Historical topographic maps were reviewed to assist in the identification of historical land use and document the general development of the Project limits and adjoining properties. Historical topographic maps of the Project limits and adjoining properties were reviewed for the years of 1901, 1942, 1947, 1953-1954, 1967, 1973, 1978, 1982, 1988, 1997, and 2012, detailed below, and are provided in Appendix F.

Table 7-4. Summary of Historical Topographic Maps

Year	Land Use Description
1901	The ISA Study Area was mostly undeveloped. Temescal Canyon Road and Temescal Wash had both crossed the ISA Study Area.
1942	BNSF Santa Fe Railroad tracks crossed the ISA Study Area between Ontario Avenue and the northern end of the ISA Study Area. Two quarry sites were located adjacent to the ISA Study Area, east of I-15. One quarry site was located at the existing intersection of Bel Air Street / State Street in the City of Corona, and the other was located northeast of the existing I-15 / Old Temescal Road in the City of Corona and had a rail spur leading to the quarry site.
1947	Multiple water channels crossed the ISA Study Area, including Bedford Wash. Agricultural land uses were located within the ISA Study Area between El Cerrito Road and the northern end of the ISA Study Area.
1953-1954	Agricultural land uses had expanded within the ISA Study Area. A ceramic factory is located where Pacific Clay Products (26800 Bernard Street, Lake Elsinore, CA) is currently located. The ceramic factory had a rail spur that connected to BNSF Santa Fe Railroad. Oil tanks were located on adjoining properties at 1375 and 1575 E. Ontario Avenue, Corona, CA. The quarry site at the existing intersection of Bel Air Street / State Street depicted in the 1942 and 1947 topographic maps had expanded west and was now within the ISA Study Area.
1967	<p>A portion of I-15 had been partially established, between I-15 / Temescal Canyon Road and I-15 / Ontario Avenue. A gravel pit was located adjacent to the ISA Study Area, east of the Project limits, near the existing LATRICRETE property (22740 Temescal Canyon Road, Corona, CA). Cajalco Road had been established east of I-15. Temescal Canyon Road had also been established.</p> <p>An unnamed mining site was located where The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) currently exist. The unnamed mining site included a sandpit, glass factory, conveyor belts, tailing ponds, water tanks, and water reservoirs. A spur railroad track within the mining site had connected with the BNSF Santa Fe/Atchison Railroad line. All areas associated with mining activities were located outside of the ISA Study Area.</p> <p>Kilns, a mining site, was located northeast of I-15/Cajalco Road where the Crossings at Corona (2470 Tuscany Street, Corona, CA) currently exist. The Kilns property had included a claypit north of Tom Barnes Street and tanks were stored onsite, including a water tank. All areas associated with mining activities were located outside of the ISA Study Area.</p> <p>Two quarry sites previously seen at the existing intersection of Bel Air Street / State Street and northeast of I-15 / Old Temescal Road, as identified in the 1942 topographic map, had been removed.</p>
1973	The ISA Study Area was generally unchanged from the 1967 topographic map.

Table 7-4. Summary of Historical Topographic Maps

Year	Land Use Description
1978	The ISA Study Area was generally unchanged from the 1973 topographic map.
1982	I-15 had been constructed to its current extent. Urban development had increased. The BNSF Santa Fe Railroad tracks had been abandoned, including the spur railroad track within the unnamed mining site where The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) currently exist. Oil tanks located on adjoining properties at 1375 and 1575 E. Ontario Avenue, Corona, CA, as identified in the 1953-1954 topographic map, had been removed.
1988	Agricultural land uses had been reduced and more urban development occurred adjacent to the ISA Study Area. A gravel pit located adjacent to the ISA Study Area near the LATRICRETE property (22740 Temescal Canyon Road, Corona, CA), as identified in the 1967 topographic map, had been removed. Cajalco Road (east of I-15) and Temescal Canyon Road had been established.
1997	The ISA Study Area was generally unchanged from the 1988 topographic map, with the exception of less agricultural land uses and more urban development adjacent to the ISA Study Area.
2012	The mining sites where The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) and the Crossings at Corona (2470 Tuscany Street, Corona, CA) are currently existing had been removed, including all associated tanks and tailing ponds.

Notes:

I-15=Interstate 15 and ISA=Initial Site Assessment

7.2.2 User-Provided Reports

A review of the I-15 ELPSE Aerially Deposited Lead Analysis (EA 08-0J0820) (Leighton 2021) and the I-15 ELPSE Limited Asbestos and Lead Chip Assessment (EA 08-0J0820) (A-Tech 2020) were conducted as part of this ISA. Copies of these reports are provided in Appendix G, and the following is a summary of the review.

I-15 Express Lanes Project Southern Extension Aerially Deposited Lead Analysis (EA 08-0J0820)

The I-15 ELPSE Aerially Deposited Lead Analysis (EA 08-0J0820) (Leighton 2021), used data that was collected in 2009 and 2010 for the I-15 Corridor Improvement Project (I-15 CIP) (EA 08-0J0800). The limits of the I-15 CIP overlap with the I-15 ELPSE Project limits, including the median, shoulders and ramps. Based on the conclusion of the report, the soil did not represent a significant environmental or health hazard, based on the ADL survey data and statistical analysis. The soil was classified as unregulated Type X soil, non-hazardous and suitable for reuse on site without restriction, according to the DTSC variance issued to Caltrans. Per the soil reuse agreement, a Lead Compliance Plan (LCP) is required for worker safety.

I-15 Express Lanes Project Southern Extension Limited Asbestos and Lead Chip Assessment (EA 08-0J0820)

The I-15 ELPSE Limited Asbestos and Lead Chip Assessment (EA 08-0J0820) (A-Tech 2020) was reviewed for the purposes of this ISA. As part of the I-15 ELPSE, a limited asbestos and lead assessment was conducted in January and February 2020 for bridges that would require widening by the proposed Project on both the NB and SB sides of the I-15, between Nichols Road and Cajalco Road in the cities of Lake Elsinore and Corona.

Based upon the analytical results, ACM is present in the gray felt pad along the SB and NB Brown Canyon Wash Bridge and Weirick Road Undercrossing Bridge inner guard rails (Table 7-5). The asbestos type is chrysotile. LBP was detected at the Temescal Wash Bridge and Indian Wash Bridge (Table 7-5). ACM and LBP associated with these bridges may be impacted by the proposed Project. The asbestos and lead assessment were limited since not all sub-surface, bridge cavity or other inaccessible materials were sampled. Live electrical components were also not sampled. These components may contain ACM or LBP and must be sampled if they will be disturbed by the Project prior to renovation/demolition activities.

Table 7-5. Asbestos and Lead Assessment Survey Findings for Affected I-15 Bridges

Post Mile	Bridge Name	Asbestos-Containing Materials	Lead-Based Paint
25.55	56-0726L/R – Gavilan Wash	None.	None.
26.69	56-0682L/R – Lake Street Undercrossing	None.	None.
27.78	56-0681L/R – Temescal Canyon Road Overhead	None.	None.
28.04	56-0680L/R – Temescal Wash	None.	LBP present in the light gray paint on the railing of NB Temescal Wash Bridge.
28.87	56-0679L/R – Horsethief Canyon Road Undercrossing	None.	None.
29.13	56-0678L/R – Horsethief Canyon Wash	None.	None.
30.09	56-0677L/R - Indian Wash	None.	LBP present in the yellow lane surface paint at NB Indian Wash Bridge.
30.4	56-0676L/R - Indian Truck Trail Undercrossing	None.	None.
31.9	56-0675L/R – Temescal Canyon Road Undercrossing	None.	None.

Table 7-5. Asbestos and Lead Assessment Survey Findings for Affected I-15 Bridges

Post Mile	Bridge Name	Asbestos-Containing Materials	Lead-Based Paint
31.97	56-0675L/R – Mayhew Wash	None.	None.
32.96	56-0543L/R – Coldwater Wash	None.	None.
33.25	56-0542L/R – Temescal Canyon Road Undercrossing	None.	None.
34.72	56-0559L/R – Brown Canyon Wash	ACM is present in the gray felt pad along the SB and NB Brown Canyon Wash Bridge inner guard rail.	None.
35.64	56-0541L/R – Weirick Road Undercrossing	ACM is present in the gray felt pad along the SB and NB Weirick Road Undercrossing Bridge inner guard rail.	None.

Notes:

ACM=asbestos-containing materials; I-15=Interstate 15; LBP=lead-based paint, NB=northbound; and SB=southbound.

7.3 Field Reconnaissance

A field reconnaissance was conducted on December 10, 11, and 14, 2020 and on April 1, 2021 for the ISA Study Area, based on the results of the EDR database search that met the criteria listed in Section 6.2. The field reconnaissance was performed by Uyenlan Vu, Aaron Newton, and Rebecca Schartau, from the RCTC consultant team, and was conducted on foot from the public ROW and from other publicly accessible areas, when feasible. The weather during the site visits were mild with temperatures in the 60s Fahrenheit with clear skies.

The purpose of the field reconnaissance was to locate potential hazardous material sites identified during the EDR database search, to locate potential contaminant sources on the identified sites (i.e. aboveground storage tanks [AST] or hazardous placards), to note general site conditions, and to identify unlisted sites in the Project vicinity that may use, store, or transport hazardous materials or wastes.

Sites examined during the reconnaissance, as identified by the EDR database search, are identified in Table 7-6 and shown on maps in Appendix C. No additional sites that may have an indication of a spill or release incident were observed during the field reconnaissance that were not already listed by the EDR

database search. The ISA Study Area and properties listed by the EDR database search were found to be well maintained with no outward signs of contamination or releases (i.e. odor, stressed vegetation, surface staining, and oil sheen) into the environment that may affect the Project. Photographs taken during the field reconnaissance are included in Appendix H.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
1	Texaco (now Mobil)	301 N. Main Street Lake Elsinore, CA	Within 0.50 mile / south-southwest	This site is currently under construction for a Mobil gas station. A chemical placard, a 55-gallon metal drum, and a clean air separator AST were located onsite.
2	Ferguson Texaco (now vacant property)	424 Main Street Lake Elsinore, CA	Within 0.25 mile / south-southwest	This site is a vacant property. Remnants of concrete or asphalt paving was seen on the property.
3	Elsinore Gas Co. Gas Plant (now vacant property)	Between Riley Street, Flint Street, Spring Street, and Pottery Street Lake Elsinore, CA	Within 0.25 mile / southwest	This site is a vacant property. De minimis surficial staining from oil was seen on the property.
4	Redman Property (now vacant property)	520 Riley Street Lake Elsinore, CA	Within 0.25 mile / southwest	This site is a vacant property. Two 55-gallon metal drums were located onsite.
5	Big Al Oil Company (now Downs Energy)	501 Spring Street Lake Elsinore, CA	Within 0.25 mile / west-southwest	This site is a Downs Energy gas station. Eight pumps on eight islands, a chemical placard, a large AST, and a clean air scrubber AST were located onsite.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
6	7-Eleven Inc. #36788	515 N. Main Street Lake Elsinore, CA	300 feet / west	This site is a 7-Eleven gas station. Four pump stations, a chemical placard, a clean air scrubber AST, and 5-gallon propane tanks were located onsite.
7	Unocal #2757	1095 Main Street N. Lake Elsinore, CA	Within Project limits	This site was not found.
8	City of Lake Elsinore Corporate Yard	521 Langstaff Street Lake Elsinore, CA	Within 300 feet / southwest	This site is a maintenance yard. A chemical placard was located on the gated front entrance. No other indication of chemicals was seen onsite that would indicate a spill or release.
9	Abel's Auto Repair LLC (now Mr. Nice Guy)	311 W. Minthorn Street Lake Elsinore, CA	Within 300 feet / south	This site is a cannabis retail site. No outward signs of hazardous substances were on the property.
10	Laidlaw Transit (now Steve's Towing)	609 Minthorn Street Lake Elsinore, CA	Within 300 feet / west-southwest	This site is an automotive towing and recovery company. No outward signs of hazardous substances were on the property.
11	Rightway	653 W. Minthorn Street Lake Elsinore, CA	Within 300 feet / southwest	This site is a portable toilet service company. A chemical placard was located on the gated front entrance, and a monitoring well cover was located east of the gated front entrance.
12	Butterfield Surveys Inc. (now residential property)	18740 Collier Avenue Lake Elsinore, CA	Within 300 feet / southwest	This site is a residential property. Three 55-gallon plastic drums were located onsite.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
13	Team Labeda Test Facility LLC DBA SoCal RV Doctor	29910 Ohana Circle, Suite 102 Lake Elsinore, CA	Within 300 feet / northeast	This site is an RV service, maintenance, repair, and storage facility. A chemical placard and a pad-mounted transformer were located onsite.
14	HI Tech Mechanical Services (now commercial business complex)	18650 Collier Avenue Lake Elsinore, CA	Within 300 feet / southwest	This site is a commercial business complex. Three suites were closed due to fire damage.
15	Applitech MFG / GNS Race Prep / First Priority Preservation LLC (now commercial business complex)	18630 Collier Avenue Lake Elsinore, CA	Within 300 feet / southwest	This site is a commercial business complex and includes a home restoration company (Suite I). A pad-mounted transformer was located onsite.
16	EVMWD-Rosetta I Pump Station	751 3rd Street Lake Elsinore, CA	Within 300 feet / southwest	This site is a pump station for the Elsinore Valley Municipal Water District. Several hazardous placards and a pad-mounted transformer were seen on site.
17	Lake Elsinore Honda	18450 Collier Avenue Lake Elsinore, CA	Within 300 feet / southwest	This site is a Honda dealership and automotive service facility. No outward signs of hazardous substances were on the property.
18	Marshalls M1354	18408 Collier Avenue Lake Elsinore, CA	Within 300 feet / southwest	This site is a clothing and home goods commercial retail store. A pad-mounted transformer was seen onsite.
19	ULTRA Beauty #1253 (Lake Elsinore)	18418 Collier Avenue Lake Elsinore, CA	Within 300 feet / southwest	This site is a beauty supply retail store. No outward signs of hazardous substances were on the property.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
20	Big 5 Sporting Goods #369	18298 Collier Avenue Lake Elsinore, CA	Within 300 / west-southwest	This site is a sporting goods retail store. No outward signs of hazardous materials were seen to be stored on the property.
21	ALDI Inc. DBA ALDI #78	18294 Collier Avenue Lake Elsinore, CA	Within 300 feet / west-southwest	This site is a grocery store. A chemical placard was located on the glass entrance doorway. No other indication of chemicals was seen onsite that would indicate a spill or release.
22	PETCO Store #1142	18290 Collier Avenue Lake Elsinore, CA	Within 300 feet / west-southwest	This site is a pet supply retail store. No outward signs of hazardous materials were seen to be stored on the property.
23	99 Cents Only Store #234	18286 Collier Avenue Lake Elsinore, CA	Within 300 feet / west-southwest	This site is a commercial retail store. No outward signs of hazardous materials were seen to be stored on the property.
24	Home Depot No HD8988	18282 Collier Avenue Lake Elsinore, CA	Within 300 feet / southwest	This site is a home improvement commercial retail store. Several 5-gallon propane tanks for retail sale were seen on site.
25	Chevron 200238	18451 Dexter Avenue Lake Elsinore, CA	Within 300 feet / east-northeast	This site is a Chevron gas station. Six pump islands, 5-gallon propane tanks, chemical placards, a clean air scrubber AST, and a pad-mounted transformer were seen onsite.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
26	Mobil #18-AAH/ Circle K Store #2709	29300 Central Avenue Lake Elsinore, CA	Within 0.25 mile / east-northeast	This site is a Circle K/Mobile gas station with a car wash facility. Seven pump islands, chemical placards, a clean air scrubber AST, 5-gallon propane tanks, multiple 55-gallon plastic drums, and a pad-mounted transformer were seen on site.
27	ARCO #5618	29355 Central Avenue Lake Elsinore, CA	Within 300 feet / north-northeast	This site is an ARCO gas station. Six pump islands, a clean air scrubber AST, 5-gallon propane tanks, and two 55-gallon metal drums with hazardous waste labels were seen onsite. A monitoring well cover was also seen near the clean air scrubber AST.
28	Lowe's #1987	29335 Central Avenue Lake Elsinore, CA	Within 300 feet / northeast	This site is a home improvement commercial retail store. Several 5-gallon propane tanks for retail sale were seen onsite. A chemical placard was located on the building structure. No other indication of chemicals was seen onsite that would indicate a spill or release.
29	Costco Wholesale No. 746 (now Costco Wholesale and Gas)	29223 & 29315 Central Avenue Lake Elsinore, CA	Within 300 feet / northeast	This site consists of a commercial retail store with one large propane AST and 5-gallon propane tanks (29315 Central Avenue), and a gas station with eight pump islands, a clean air separator AST, and a pad-mounted transformer (29223 Central Avenue).

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
30	Bath & Body Works #1841 / Gap Outlet 1929 / Party City (Outlets at Lake Elsinore)	17600 Collier Avenue Lake Elsinore, CA	Within 300 feet / southwest	This site is a commercial retail shopping center. A pad-mounted transformer was seen on the property.
31	ARCO AM/PM	19930 Collier Avenue Lake Elsinore, CA	Within 300 feet / southwest	This site is an ARCO gas station with a car wash facility. Six pump islands, a clean air scrubber AST, 5-gallon propane tanks, and a 55-gallon metal drum with a hazardous waste label were seen onsite. The hazardous waste label stated the drum stored absorbent and debris materials. De minimis surficial staining from oil was seen on the concrete underneath the drum.
32	Unnamed Site	Nichols Rd at I-15 Lake Elsinore, CA	Within Project limits	This site is the Nichols Road / I-15 interchange. A construction laydown area was seen adjacent to the NB I-15 Nichols Road on-ramp.
33	Nichols Canyon Mine (now Chandler Aggregates Inc.)	10000 Nichols Road Lake Elsinore, CA	Within 300 feet / northeast	This site is a mining site and includes Chandler Aggregates Inc. as a mining operator. A chemical placard was seen on the front entrance gate. No other indication of chemicals was seen onsite that would indicate a spill or release.

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
90	Corona Trucking Inc. (now Westrax Machinery / A.S.A.P. Heavy Equipment Rental)	19885 Temescal Canyon Road Corona, CA	Within 0.50 mile / northeast	This site is a heavy construction equipment rental company. No outward signs of hazardous substances were on the property.
91	Wayside Dairy (now vacant property)	19630 Temescal Canyon Road Corona, CA	Within 0.50 mile / east-northeast	This site is a vacant property that was fenced off. No outward signs of hazardous substances were on the property.
92	76 Station 0522	19570 Temescal Canyon Road Corona, CA	Within 0.50 mile / east-northeast	This site is a 76 gas station. Four pump islands, a clean air scrubber AST, 5-gallon propane tanks, and a pole-mounted transformer were located onsite.
93	El Cerrito ARCO (now Kim's Auto)	19501 Ontario Avenue Corona, CA	Within 0.50 mile / east-northeast	This site is an automotive service and repair shop that also conducts smog checks and oil changes.
94	El Cerritos Maintenance Yard	19355 Ontario Avenue Corona, CA	Within 0.25 mile / east-northeast	This site is a gated maintenance yard. Chemical placards and an AST were located onsite.
95	United Heckathron	1499 Ontario Avenue Corona, CA	Within 0.25 mile / west-northwest	This site was not found.
96	SCE Chase Substation	1390 E. Ontario Avenue Corona, CA	Within 0.25 mile / west-northwest	This site is an electrical substation. A chemical placard mounted on the gated front entrance was seen.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
97	Corona 76	2240 Compton Avenue Corona, CA	Within 300 feet / west	This site is a 76 gas station. Seven pump islands, two clean air scrubber ASTs, chemical placards, 5-gallon propane tanks, and a 55-gallon metal drum were located onsite. A newly paved concrete pad area with concrete posts along the parameter was seen and may be a new site for a large propane AST.
98	ARCO #5676	1402 E. Ontario Avenue Corona, CA	Within 300 feet / west-southwest	This site is an ARCO AM/PM gas station with a carwash facility. Six pump stations and 5-gallon propane tanks were located onsite. Two monitoring wells are also located near the carwash exit.
99	Sam's Club #4709	1375 E. Ontario Avenue Corona, CA	Within 300 feet / west-northwest	This site is a commercial retail store. Two pad-mounted transformers are located onsite. A chemical placard mounted on the front of the building was seen.
100	Sam's Club #4709 – Fuel Station Only	1395 E. Ontario Avenue Corona, CA	Within 300 feet / west-northwest	This site is a Sam's Club gas station. Six pump islands, a clean air scrubber AST, and 55-gallon metal drum with a hazardous waste label were located onsite. The hazardous waste label stated the contents in the drum included fuel, debris, and absorbent.
101	Sherwin Williams #8531	2163 Compton Avenue Corona, CA	Within 300 feet / west-northwest	This site is a paint retail store. A pad-mounted transformer was located onsite.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
102	Mountain View Tire & Services Inc.	1630 E. Ontario Avenue Corona, CA	Within 300 feet / east	This site is a tire and automotive service facility. Multiple 55-gallon metal drums and spill pallets are located onsite. A chemical placard mounted on the front of the building was seen.
103	T & R Lube Centers DBA Jiffy Lube	1600 E. Ontario Avenue Corona, CA	Within 300 feet / east	This site is an automotive maintenance facility that conducts oil changes. A pad-mounted transformer is located onsite.
104	Corona Oil Co. Inc. / Shell	1550 E. Ontario Avenue Corona, CA	Within 300 feet / east	This site is a Shell gas station. Eight pump islands, a clean air scrubber AST, 5-gallon propane tanks, a 55-gallon plastic drum, and a pad-mounted transformer are located onsite.
105	Dwight H. Holcomb	1445 E. Ontario Avenue, #22 Corona, CA	Within 300 feet / east-northeast	This site was not found.
106	NW Corner Ontario Ave & State St (now Corona Cerrito Plaza)	1535 E. Ontario Avenue Corona, CA	Within 300 feet / east-northeast	This site is a commercial shopping plaza. No outward signs of hazardous substances were on the property.
107	Ontario Cleaners	1551 E. Ontario Avenue, Suite 102 Corona, CA	Within 300 feet / east	This site is a dry cleaning facility. No outward signs of hazardous substances were on the property.
108	NWC of Ontario and State (now TLC 4 Kids)	1585 E. Ontario Avenue Corona, CA	Within 0.25 mile / east	This site is a children daycare facility. No outward signs of hazardous substances were on the property.
109	J C MC Clinton Trucking Co. Inc.	18430 Compton Avenue Corona, CA	Within 300 feet / west	This site was not found.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
110	Southern California Edison	2000 Compton Avenue Corona, CA	Within 300 feet / west	This site was not found.
111	CIMCO Corona (now Northwest Mosquito & Vector Control District)	1966 Compton Avenue Corona, CA	Within 300 feet / west	This site is a vector control service company. A chemical placard was mounted on the front entrance gate, and pad-mounted transformer was located onsite.
112	Advanced Fuel Filtration Systems (now South Coast Industrial Door)	1275 Graphite Drive Corona, CA	Within 0.25 mile / west	This site in an industrial door repair and installation service company. No outward signs of hazardous substances were on the property.
113	Amerisource Bergen	1851 California Avenue Corona, CA	Within 300 feet / west	This site is a pharmaceutical distribution facility. A pad-mounted transformer was located onsite.
114	Factory Connection Inc. (now vacant property)	1761 California Avenue, Suite 102 Corona, CA	Within 300 feet / west	This site is a vacant property located in a commercial building complex. No outward signs of hazardous substances were on the property.
115	Best Buy Pacific Sales #1711 (now Pacific Sales Kitchen & Bath Centers)	1385 Pico Street Corona, CA	Within 300 feet / west-southwest	This site is a home appliance retail store. No outward signs of hazardous substances were on the property.
116	Laminated Shim Co. / SHIM-IT Corp.	1691 California Avenue Corona, CA	Within 300 feet / west-southwest	This site is a manufactory and distributor of laminated shims. Chemical placards, a small AST, 55-gallon metal drums, and a pad-mounted transformer were located onsite.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
117	Quality Business Solutions Inc. (now Milipharm Nutraceuticals Inc.)	1161 California Avenue Corona, CA	Within 300 feet / southwest	This site is a drug and cosmetic manufactory. A pad-mounted transformer was located onsite.
118	Chevron Stations Inc. (now Smith & Noble / Coldwell Bank / Blackstone Realty)	1181 California Avenue Corona, CA	Within 300 feet / southwest	This site consists of multiple commercial businesses including a window installation company, a bank, and real estate firm. A pad-mounted transformer was located onsite.
119	El Super #56	1212 Magnolia Avenue Corona, CA	Within 300 feet / west-northwest	This site is a grocery store. No outward signs of hazardous substances were on the property.
120	Dollar Tree #02972 & O'Reilly Auto Parts 2732	1220 Magnolia Avenue, Suites 101 & 102 Corona, CA	Within 300 feet / northwest	This site is a commercial retail store (Suite 101) and an automotive parts store (Suite 102) located in the Corona Marketplace shopping plaza. A chemical placard mounted on the front window of the Dollar Tree store was seen.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
121	Shell Magnolia Corona	1205 Magnolia Avenue Corona, CA	Within 0.50 mile / northwest	This site is a Shell gas station with a car wash facility. Six pump islands, 5-gallon propane tanks, a carbon dioxide refrigerated liquid AST, two 55-gallon metal drums with hazardous waste labels, a clean air scrubber AST, and a pad-mounted transformer were located onsite. The hazardous waste labels stated the one drum contained water with gasoline, and the other drum contained absorbent, debris, and filters containing gasoline.
122	Romar Fleet SVC (now Corona Fleet & Automotive Repair)	1248 Magnolia Avenue Corona, CA	Within 300 feet / north	This site is a fleet and an automotive repair facility. A pad-mounted transformer was located onsite.
123	Downs Energy	1232 Magnolia Avenue Corona, CA	Within 300 feet / north	Refer to Site 125.
124	Downs Energy	1226 Magnolia Avenue Corona, CA	Within 300 feet / north	Refer to Site 125.
125	Downs Oil Co. Inc.	1296 Magnolia Avenue Corona, CA	Within 0.25 mile / north	This site is a commercial fleet fueling station. Multiple pump stations and large ASTs were located onsite.
126	Corona Disposal Site	Near Magnolia Avenue and Compton Avenue Corona, CA	Within 300 feet / north-northeast	This site is a closed solid landfill facility. A pad-mounted transformer was located onsite.

Table 7-6. Field Reconnaissance of Environmental Data Resources Identified Sites

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits	Site Conditions
127	Corona Cross Roads (now undeveloped property)	Approximately 0.35 mile southeast of Magnolia Avenue / Sherborn Street Corona, CA	Within 0.50 mile / east-northeast	This site appears to be undeveloped. A fleet truck, excavator, two large storage containers, and four 55-gallon metal drums were located onsite. De minimis surficial staining from oil was seen on the property.
128	Sherborn Magnolia Drum Site	Sherborn Street and Magnolia Avenue Corona, CA	Within 0.50 mile / north-northeast	This site was not found.
129	RICH MFG CO of CA #3 (now McWane Ductile / Clow Valve)	1375 Magnolia Avenue Corona, CA	Within 0.50 mile / north	This site is operated by Clow Valve as a manufacturing facility for waterwork valves and fire hydrants. In addition, McWane Ductile also operates at the site as a retail and service facility for ductile iron pipe.

Notes:

^aRefer to Appendix C for maps showing the location of each site.

AST=aboveground storage tank; I-15=Interstate 15; IBC=intermediate block container; ID=Identification, N/A=not applicable; and PM=Post Mile.

7.3.1 Utilities and Transformers

Pad-mounted transformers were located on 30 sites that adjoined the Project limits; 28 of these sites are listed in Table 7-6 and the remaining two sites were readily visible at 23758 Temescal Canyon Road and the NB I-15 El Cerrito Road on-ramp. The pad-mounted transformers were on concrete pads and no staining or indications of leakage of dielectric fluid were present in the vicinity of the transformers. The pad-mounted transformers were owned by various utility companies, including Southern California Edison. In addition, one utility pole-mounted transformer was located on a property adjoining the Project limits, as listed in Table 7-6. The utility companies would be responsible for any reporting, inspections, testing, or release response. No other potential polychlorinated biphenyl (PCB) containing equipment was present at the time of the site reconnaissance and none were identified to be located within the Project limits.

7.4 Agency Records Review

Following the gathering of information from the EDR database search, the historic land use review, and the field reconnaissance, the list of potential contaminant sources was narrowed based on historical land use, regulatory information (i.e. database listing type indicating release incidents and mining sites such as

LUST, ENVIROSTOR, VCP, RESPONSE, SEMS, Cortese, PRP, CPS-SLIC, MINES, US MINES, ABANDONED MINES, and MINES MRDS), the distance from the Project limits, and the information gathered during the field reconnaissance. A regulatory agency file review was then conducted for sites that met these criteria where more information is needed to develop a better understanding of potential contaminant sources that could impact the Project (Table 7-7).

Table 7-7. List of Sites for Agency Records Review

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits
1	Texaco (now Mobil)	301 N. Main Street Lake Elsinore, CA	Within 0.50 mile / south-southwest
2	Ferguson Texaco (now vacant property)	424 Main Street Lake Elsinore, CA	Within 0.25 mile / south-southwest
3	Elsinore Gas Co. Gas Plant (now vacant property)	Between Riley Street, Flint Street, Spring Street, and Pottery Street Lake Elsinore, CA	Within 0.25 mile / southwest
4	Redman Property (now vacant property)	520 Riley Street Lake Elsinore, CA	Within 0.25 mile / southwest
5	Big Al Oil Company (now Downs Energy)	501 Spring Street Lake Elsinore, CA	Within 0.25 mile / west- southwest
6	7-Eleven Inc. #36788	515 N. Main Street Lake Elsinore, CA	Within 300 feet / west
7	Unocal #2757	1095 Main Street N. Lake, CA	Within Project limits
8	City of Lake Elsinore Corporate Yard	521 Langstaff Street Lake Elsinore, CA	Within 300 feet / southwest
10	Laidlaw Transit (now Steve's Towing)	609 Minthorn Street Lake Elsinore, CA	Within 300 feet / west- southwest
11	Rightway	653 W. Minthorn Street Lake Elsinore, CA	Within 300 feet / southwest
26	Mobil #18-AAH / Circle K Store #2709	29300 Central Avenue Lake Elsinore, CA	Within 0.25 mile / east- northeast
27	ARCO #5618	29355 Central Avenue Lake Elsinore, CA	Within 300 feet / north- northeast
32	Unnamed Site	Nichols Rd at I-15 Lake Elsinore, CA	Within Project limits

Table 7-7. List of Sites for Agency Records Review

Site ID^a	Site Name	Address	Distance/Direction from Project Limits
33	Nichols Canyon Mine (now Chandler Aggregates Inc.)	10000 Nichols Road Lake Elsinore, CA	Within 300 feet / northeast
34	Bridge Maintenance on I-15 PM 25.55 Over Gavillan Wash Project (now Gavilon Wash Bridge)	I-15 PM 25.55 Lake Elsinore, CA	Within Project limits
35	WYROC Lake Street Quarry (now vacant and for sale/lease property)	31000 Lake Street Lake Elsinore, CA	Within 300 feet / south
36	Unnamed Site	NB I-15 Lake Street On-Ramp Lake Elsinore, CA	Within Project limits
37	Pacific Clay Products	14741 Lake Street Lake Elsinore, CA	Within 300 feet / south
39	Soil Binder	Lake Elsinore, CA	Within 0.25 mile / north
49	Indian Truck Trail I-15 Interchange	Temescal Canyon to Campbell Ranch Road Lake Elsinore, CA	Within Project limits
52	SCE / Maitri Road Recycling / Kimball Equip Co. (now Mayhew Aggregates & Mine Reclamation / CEMEX / Maitri Road Recycling / Kimball Equipment Company / West Coast Sand & Gravel Inc.)	24980 Maitri Road Corona, CA	Within 0.25 mile / west-southwest
53	Mission Clay Products	23835 Temescal Canyon Road Corona, CA	Within 0.25 mile / southwest
54	ARCO AM/PM Mini Mart	23760 Temescal Canyon Road Corona, CA	Within 300 feet / southwest
55	Unnamed Site	Temescal Canyon Road & I-15 Corona, CA	Within Project limits
56	Rancho Serrano High School (now vacant property)	Lawson Drive / Temescal Canyon Road Corona, CA	Within 300 feet / west-southwest

Table 7-7. List of Sites for Agency Records Review

Site ID^a	Site Name	Address	Distance/Direction from Project Limits
58	Hydro Conduit Corp (now vacant property)	23200 Temescal Canyon Road Corona, CA	Within 0.25 mile / east-northeast
66	Wild Rose Development (now Wild Rose Ranch Community Association)	Highway 15 (Near Clay Canyon) Corona, CA	Within 300 feet / southwest
68	Standard Ready Mix Concrete (now Materials Specialties Corporation and Gail Materials)	22300 Temescal Canyon Road Corona, CA	Within 0.25 mile / east-northeast
71	Villa Park Trucking (now Vaughan Trucking, LLC)	21880 Temescal Canyon Road Corona, CA	Within 300 feet / east-northeast
72	FST Sand & Gravel Inc.	21780 Temescal Canyon Road Corona, CA	Within 300 feet / east-northeast
76	Coronita Ranch Sand Deposit	Corona, CA	Within Project limits
78	Cajalco Rd / I-15 Interchange Improvement	Cajalco Road and Interstate 15 Corona, CA	Within Project limits
79	Liston Aluminum Brick Company (now unnamed site)	3710 & 20401 Temescal Canyon Road Corona, CA	Within 300 feet / east
80	Liston Aluminum Company Site (now residential property)	9107 Cajalco Road Corona, CA	Within 1.0 mile / east
84	Gateway Business Park (now Crossings at Corona)	20325 Temescal Canyon Road Corona, CA	Within 300 feet / northeast
90	Corona Trucking Inc. (now Westrax Machinery / A.S.A.P. Heavy Equipment Rental)	19885 Temescal Canyon Road Corona, CA	Within 0.50 mile / northeast
91	Wayside Dairy (now vacant property)	19630 Temescal Canyon Road Corona, CA	Within 0.50 mile / east-northeast
92	76 Station 0522	19570 Temescal Canyon Road Corona, CA	Within 0.50 mile / east-northeast
93	El Cerrito ARCO (now Kim's Auto)	19501 Ontario Avenue Corona, CA	Within 0.50 mile / east-northeast
96	SCE Chase Substation	1390 E. Ontario Avenue Corona, CA	Within 0.25 mile / west-northwest

Site ID ^a	Site Name	Address	Distance/Direction from Project Limits
98	ARCO #5676	1402 E. Ontario Avenue Corona, CA	Within 300 feet / west-southwest
106	NW Corner Ontario Ave & State St (now Corona Cerrito Plaza)	1535 E. Ontario Avenue Corona, CA	Within 300 feet / east-northeast
108	NWC of Ontario and State (now TLC 4 Kids)	1585 E. Ontario Avenue Corona, CA	Within 0.25 mile / east
110	Southern California Edison	2000 Compton Avenue Corona, CA	Within 300 feet / west
121	Shell Magnolia Corona	1205 Magnolia Avenue Corona, CA	Within 0.50 mile / northwest
125	Downs Oil Co. Inc.	1296 Magnolia Avenue Corona, CA	Within 0.25 mile / north
127	Corona Cross Roads (now undeveloped property)	N/A Sherborn Street Corona, CA	Within 0.50 mile / east-northeast
128	Sherborn Magnolia Drum Site	Sherborn Street and Magnolia Avenue Corona, CA	Within 0.50 mile / north-northeast

Notes:

^aRefer to Appendix C for maps showing the location of each site.

I-15=Interstate 15; ID=identification; N/A=not applicable; and PM=Post Mile.

The agency files were reviewed for the most recent site status information and the nature and extent of contamination, as well as pertinent land uses, geologic, hydrogeologic, and other information that may be used to assess potential impacts on the Project. Files maintained by the SWRCB GeoTracker database, DTSC EnviroStor database, and the EDR Area/Corridor Report were reviewed in February, March, and April 2021. A request for file review to the RCDEH – Hazardous Materials Management Branch, Santa Ana Regional Water Quality Control Board, or DTSC was not requested, because available site records provided on the SWRCB GeoTracker, DTSC EnviroStor, and the EDR Area/Corridor Report were sufficient in assessing potential impacts to the Project. Pertinent records reviewed are included in Appendix I of this report. Examples of pertinent records include maps showing the location of soil borings and groundwater monitoring wells, maps delineating contamination plumes, and case closure letters. A summary of the agency records review is provided in Table 7-8.

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
1	Texaco (now Mobil) 301 N. Main Street Lake Elsinore, CA	Within 0.50 mile / south-southwest	HIST UST, LUST, Cortese, CERS, CA FID UST, SWEEPS UST	During the operation of the site by Texaco, four to six USTs were removed in February 1999. Soil and groundwater contaminated with TPH-g and MTBE and other contaminants were detected. Site remediation activities had included the removal of 294 tons of soil in 1999 and dual-phase extraction activities in 2003 and 2004 that had removed 7,729 gallons of groundwater and 8.55 lbs of TPH-g vapor. Historical depth to groundwater at the property ranged from 14 to 23 feet bgs, with a north-northwest flow direction. An NFA was granted by the RCDEH on October 7, 2010 (RCDEH LOP Case #: 9915833).
2	Ferguson Texaco (now vacant property) 424 Main Street Lake Elsinore, CA	Within 0.25 mile / south-southwest	HAZNET, LUST, HIST CORTESE, CERS, CERS HAZ WASTE, HWTS, RCRA-SQG, UST, CA FID UST, Cortese, SWEEPS UST, EDR Hist Auto	During the operation of the site by Ferguson Texaco, one waste oil AST was removed in 1994 and four USTs were removed in 2004. Soil contaminated with TPH-g, TPH-d, BTEX, and MTBE was detected from sampling activities following the removal of the USTs. Soil and groundwater site investigations conducted in 2008, 2009, and 2010 had showed a gradual decrease in concentration levels of contaminants with results of low to non-detect levels. Further investigation on- or off-site of this property was deemed to be unnecessary by the SARWQCB (<i>Case Closure Summary</i> , SARWQCB 2011). Historical depth to groundwater at the property ranged from 32 to 35 feet bgs, with a southwest flow direction. An NFA was granted by the SARWQCB on April 4, 2011 (SARWQCB Case #: 083302367T).
3	Elsinore Gas Co. Gas Plant (now vacant property) Between Riley Street, Flint Street, Spring Street, and Pottery Street Lake Elsinore, CA	Within 0.25 mile / southwest	VCP, ENVIROSTOR, EDR MGP	This site was approximately 2.8 acres and was used as an MGP in 1920 through 1929. From 1923 to 1953 this facility was used as a storage for natural gas. MGP operation at the site had contaminated the soil with PAHs. A total of 3.394 tons of PAH contaminated soil with benzo(a)pyrene equivalent concentrations above 0.9 mg/kg was excavated and removed. DTSC has determined that all appropriate removal/remedial actions have been completed and that all acceptable engineering practices were implemented and the site requires no operation and maintenance and monitoring efforts (Remedial Action Certification Form, DTSC 2003) (DTSC VCP Case #: 33490082).
4	Redman Property (now vacant property) 520 Riley Street Lake Elsinore, CA	Within 0.25 mile / southwest	LUST, Cortese, CERS	This site was previously operated by the County of Riverside as a road maintenance yard known as the Old Elsinore Road Yard. The County had operated two USTs until 1975. In 1978, the County sold the property to Mr. and Mrs. Redman. In 1993, the two USTs were removed and holes were observed in both USTs. Soil contamination consisting of TPH-g, TPH-d, TRPH, and BTEX were detected. The Redmans filed a lawsuit against the County for the site contamination which had resulted in the County purchasing back the property and referring the case to the SARWQCB on March 3, 1995. Site investigation activities were conducted between 1996 to 2012. Soil and groundwater contamination concentration levels were found to have decreased over the years. No actual soil or groundwater remediation was conducted at the site. Residual contaminant concentrations remain and any change in land use will result in a soil gas survey and/or a human health risk assessment. In addition, since there are no water supply wells located within 0.50-mile radius of the site, the residual groundwater contaminant concentrations should not pose a threat to water quality in this area (<i>Case Closure Summary</i> , SARWQCB 2014). Historical depth to groundwater at the property ranged from 8.16 to 16.35 feet bgs, with a northeast, south, and southwest flow direction. An NFA was granted by the SARWQCB on March 10, 2014 (SARWQCB Case #: 083301248T).

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
5	Big Al Oil Company (now Downs Energy) 501 Spring Street Lake Elsinore, CA	Within 0.25 mile / west-southwest	CA FID UST, EMI, LUST, CHMIRS, Cortese, SWEEPS UST, HIST CORTESE, RCRA NonGen / NLR, CERS, UST, HAZNET, CERS TANKS, CERS HAZ WASTE, HWTS	During the operation of the site by Big Al Oil Company, soil and groundwater contamination were detected following the removal of four USTs in 1991. Site remediation activities included excavation and bioremediation of 675 cubic yards of soil underneath the USTs, and excavation and disposal of 2,000 cubic yards of soil underneath the dispensers. Contaminants in groundwater have been non-detect in all monitoring wells since 2001 with the exception of low levels of MTBE (9 ppb) in MW4. An NFA was granted by the RCDEH on November 30, 2005 (RCDEH LOP Case #: 91081).
6	7-Eleven Inc. #36788 515 N. Main Street Lake Elsinore, CA	Within 300 feet / west	EDR Hist Auto, HAZNET, CERS, CERS TANKS, CERS HAZ WASTE, HWTS, RCRA NonGen / NLR, CA FID UST, HIST UST, SWEEPS UST, UST, LUST, Cortese	During the operation of the site by a 76 gas station, a case was opened in September 2000 for soil and groundwater contamination that was discovered during fuel system upgrade activities (SWRCB 2021). Site remediation activities included the removal of 41.74 tons of contaminated soil generated during station upgrades in 2000, treatment and disposal of 47,000 gallons of contaminated groundwater from 2005 to 2013, and SVE to remove TPH-g, BTEX, and MTBE from 2005 to 2013. The lateral extent of hydrocarbons in the groundwater was limited to the vicinity of the dispenser islands. Groundwater was sampled until July 8, 2013, by which time TPH-g had decreased from 89000 ppb to 1200 ppb. BTEX, MTBE, and TBA had all decreased to non-detect levels. Historical depth to groundwater at the property ranged from 29.54 to 41.70 feet bgs. Groundwater flow direction has been predominately to the west with fluctuations from southwest to southeast. An NFA was granted by the RCDEH on July 15, 2014 (RCDEH LOP Case #: 200117545).
7	Unocal #2757 1095 Main Street N. Lake, CA	Within Project limits	RGA LUST	According to the SWRCB UST Cleanup Fund Priority List (dated June 29, 2012), UNOCAL #2757 at 1095 Main Street is located in the City of Lakeport and not in the City of Lake Elsinore.
8	City of Lake Elsinore Corporate Yard 521 Langstaff Street Lake Elsinore, CA	Within 300 feet / southwest	LUST, HIST CORTESE, HIST UST, HAZNET, CERS, CERS HAZ WASTE, HWTS, RCRA NonGen / NLR, Cortese	This site has been operated by the City of Lake Elsinore as a maintenance yard since the early 1900s. During routine UST inspections on May 13, 1987, one of four USTs onsite had failed a leak test. Site investigation activities determined soil contaminated with TPH was below the USTs and had migrated east and west to the mechanic shop and under the storage building at a depth of 25 feet before rock was encountered. All four USTs were removed by August 18, 1988. The southeast end of the mechanic shop and the supply building were removed in order to remove the USTs and contaminated soils. Approximately 3,500 cubic yards of contaminated soil was removed. Upon completion of site investigation and remediation activities, a case closure was granted on May 3, 1989 (RCDEH LOP Case #: 88062).
10	Laidlaw Transit (now Steve's Towing) 609 Minthorn Street Lake Elsinore, CA	Within 300 feet / west-southwest	LUST, Cortese, CERS, RCRA NonGen / NLR, HIST UST, HIST CORTESE, RCRA-SQG, FINDS, ECHO	During the operation of the site by Laidlaw Transit, a case was opened on March 2, 1988 for soil contamination that was discovered during closure of a UST. The soil was contaminated with heating oil/fuel oil and the cause of the contamination was due to corrosion of the tank. A case closure was granted on April 4, 1989 (SARWQCB Case #: 083300978T).
11	Rightway 653 W. Minthorn Street Lake Elsinore, CA	Within 300 feet / southwest	RCRA NonGen / NLR, FINDS, ECHO, HIST UST, LUST, Cortese, HIST CORTESE, CERS, CERS HAZ WASTE	During the operation of the site by Rightway Portable Toilets, a case was open on July 24, 1986 for soil contamination that was discovered during a UST tank tightness test. The soil was contaminated with gasoline. A case closure was granted on April 4, 1989 (SARWQCB Case #: 083300324T).

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
26	Mobil #18-AAH / Circle K Store #2709 29300 Central Avenue Lake Elsinore, CA	Within 0.25 mile / east-northeast	LUST, EDR Hist Auto, RCRA NonGen / NLR, CHMIRS, NPDES, CIWQS, CERS, CERS TANKS, CERS HAZ WASTE, UST Cortese, CA FID UST, SWEEPS UST, RCRA-SQG, FINDS, ECHO	During the operation of the site by Mobil, a case was opened on November 29, 2001 as a result of soil and groundwater contamination that was discovered during fuel system upgrade activities (SWRCB 2021). Site remediation activities consisted of Dual Phase Vacuum Extraction that was operated from October 13, 2005 to June 12, 2006 and had removed 725 pounds of VOCs and 85 pounds of TPH-g (<i>Case Closure Summary</i> , RCDEH LOP 2010a). Groundwater was sampled until January 12, 2010, by which time TPH-g had decreased from 12500 ppb to <100 ppb. Benzene had decreased from 29 ppb to <0.5 ppb and had not been detected above 1 ppb since November 2005. MTBE had decreased from 12000 ppb to 1.3 ppb. TBA had decreased from 135000 ppb to 29 ppb. Historical depth to groundwater ranged from 25.06 to 41.23 feet bgs, with a general flow direction to the southwest. Upon completion of site investigation and remediation activities, a case closure was granted on January 13, 2011 (RCDEH LOP Case #: 200118158).
27	ARCO #5618 29355 Central Avenue Lake Elsinore, CA	Within 300 feet / north-northeast	LUST, RCRA-SQG, FINDS, ECHO, UST, CHMIRS, CA FID UST, HAZNET, Cortese, SWEEPS UST, CERS, HWTS, RCRA NonGen / NLR, EDR Hist Auto, CERS TANKS, CERS HAZ WASTE	During the operation of the site by ARCO, a case was opened on November 22, 2002 for soil and groundwater contamination that was discovered during fuel system upgrade activities (SWRCB 2021). Soil contamination was non-detect and groundwater contamination was non-detect except for bromodichlorom ethane (0.46J), chloroform (0.49J), and dibromochlorom ethane (0.57J) per sampling activities in 2009 (<i>Case Closure Summary</i> , RCDEH LOP 2010b). Active remediation was not required to restore or protect groundwater quality based on groundwater monitoring data collected. Historical depth to groundwater at this site was approximately 29.53 to 41.36 feet bgs with a trending flow direction to the south-southwest. A case closure was granted on June 1, 2010 (RCDEH LOP Case #: 200319347).
32	Unnamed Site Nichols Rd at I-15 Lake Elsinore, CA	Within Project limits	CHMIRS	A spill incident had occurred on October 3, 1996 that involved 20 lbs of drug lab waste on the road at Nichols Street / I-15 (EDR 2020a). The spill incident was found by a sheriff deputy while on patrol. No additional agency records were available for this site.
33	Nichols Canyon Mine (now Chandler Aggregates Inc.) 10000 Nichols Road Lake Elsinore, CA	Within 300 feet / northeast	MINES	The Nichols Canyon Mine comprises approximately 199 acres located both north and south of Nichols Road, east of I-15. This site is an active mining site for sand and gravel and is currently operated by Chandler Aggregates Inc (EDR 2020a).
34	Bridge Maintenance on I-15 PM 25.55 Over Gavillan Wash Project (now Gavilon Wash Bridge) I-15 PM 25.55 Lake Elsinore, CA	Within Project limits	CERS, CIWQS	This site had a Section 401 Certification between 2015 and 2020 for the discharge of dredge and fill material (EDR 2020a).
35	WYROC Lake Street Quarry (now vacant and for sale/lease property) 31000 Lake Street Lake Elsinore, CA	Within 300 feet / south	MINES, CERS	The WROC Lake Street Quarry site is a mining site currently in progress to be reclaimed by Lake Street Properties L.P (EDR 2020a). A portion of the site is designated for future development, including approximately 1.0-1.5 acres designated for sale or lease to become a gas station/fast food establishment.

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
36	Unnamed Site NB I-15 Lake Street On-Ramp Lake Elsinore, CA	Within Project limits	CHMIRS	A release/spill incident was reported on February 19, 1988 (EDR 2020a). No additional agency records were available for this site.
37	Pacific Clay Products 14741 Lake Street Lake Elsinore, CA	Within 300 feet / south	MINES, ABANDONED MINES, US MINES, RCRA NonGen / NLR, HIST UST, UST, RCRA-SQG, US AIRS, ICIS, CA FID UST, EMI, LUST, Cortese, WDS, SWEEPS UST, HIST CORTESE, ENF, CERS, AST, HAZNET, CERS TANKS, CERS HAZ WASTE, HWTS, FINDS, ECHO, SEMS-ARCHIVE	<p>This site is an active clay mine and brick/brick products manufacturing facility that is operated by Pacific Clay Products. The northern portion of the site contains the processing equipment (including kilns) for manufacturing clay products, and the southern portion of the site contains the clay mines and mixing pads. Three 10,000 gallon USTs were removed at three locations (Areas, 1, 2, and 3) on July 15, 1998. A separate case was opened for each tank due to site contamination.</p> <p>Area 1 contained a gasoline UST that had resulted in soil contamination. Area 1 was remediated by excavation of 159 tons of soil from the site to 15 feet bgs. Confirmation soil samples showed non-detect levels for all contaminants with the exception of low levels of toluene at 0.011 ppm and xylenes at 0.006 ppm. A NFA was granted by the RCDEH on September 8, 2000 (RCDEH LOP Case #: 980655).</p> <p>Area 2 contained a diesel fuel UST that had resulted in soil contamination. Area 2 was remediated by excavation of 58 tons of soil from the former UST location. Confirmation soil samples showed non-detect levels for all contaminants. An NFA was granted by the RCDEH on March 23, 1999 (RCDEH LOP Case #: 980657).</p> <p>Area 3 contained a red dye diesel fuel UST that had resulted in soil contamination. Area 3 was remediated by excavation of 55 tons of soil that was transported offsite for treatment and recycling. Confirmation soil samples showed non-detect levels for all contaminants. An NFA was granted by the RCDEH on March 23, 1999 (RCDEH LOP Case #: 980657).</p>
39	Soil Binder Lake Elsinore, CA	Within 0.25 mile / north	US MINES	This site is listed on the US MINES database per the EDR Area/Corridor Report (EDR 2020a). No additional agency records were available for this site, including from the USGS MRDS website (site accessed April 2021).
49	Indian Truck Trail I-15 Interchange Temescal Canyon to Campbell Ranch Road Lake Elsinore, CA	Within Project limits	CIWQS	This site had no site violations or enforcement actions listed in the EDR Area/Corridor Report (EDR 2020a). No additional agency records were available for this site

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
52	SCE / Maitri Road Recycling / Kimball Equip Co. (now Mayhew Aggregates & Mine Reclamation / CEMEX, Maitri Road Recycling / Kimball Equipment Company / West Coast Sand & Gravel Inc.) 24980 Maitri Road Corona, CA	Within 0.25 mile / west-southwest	HIST UST, HAZNET, LUST, Cortese, CIWQS, CERS, HWTS, CA FID UST, SWEEPS UST, HIST CORTESE, NPDES	<p>During the operation of the site by Sunwest Materials, a case was opened on October 14, 1999 for soil contamination that was discovered during the removal of a diesel UST (SWRCB 2021). The contamination in the soil was at a depth of approximately 17 feet bgs. Site investigation and remediation activities were conducted between 1999 and 2000. Remediation activities consisted of excavation of 874 cubic yards of soil to a depth of 30 feet bgs. Soil that was highly contaminated was disposed at an approved facility. Soils with low level contamination was utilized as material for making concrete at the Sunwest Concrete Plant in Corona. Groundwater was not encountered during remediation activities. Confirmation soil samples at 29 feet bgs showed only low levels of contamination (less than 100 ppm TPH-d) remained. An NFA was granted by the RCDEH on April 14, 2003 (RCDEH LOP Case #: 9915865).</p> <p>According to the Maitri Road Recycling Annual Monitoring Report (AE 2020), the site is currently owned and operated by Mayhew Aggregates and Mine Reclamation. Maitri Road Recycling is located on 225 acres of the property and accepts only insert solid waste. The recycling facility will operate at the site for approximately 50 years.</p>
53	Mission Clay Products 23835 Temescal Canyon Road Corona, CA	Within 0.25 mile / southwest	LUST, NPDES, CIWQS, CERS, Cortese, HIST CORTESE, HAZNET, CERS HAZ WASTE, HWTS, CA FID UST, SWEEPS UST	<p>During the operation of the site by Mission Clay Products, a case was opened on October 4, 1993 as a result of TPH-d soil contamination that was discovered during the removal of three USTs (SWRCB 2021). The contamination in the soil was 4,400 ppm found beneath the tank and 25,300 ppm on the side wall. Site investigation and remediation activities were conducted between 1993 and 1995. Remediation activities consisted of excavation of 1,800 yards of contaminated soil that was stockpiled onsite. Confirmation soil samples at 23 feet bgs underneath the bottom of the excavation and 17 feet bgs along the excavation walls were non-detect for all contaminants. The soil stockpile showed results ranging from non-detect to 13,600 ppm TPH-d. The majority of the samples were under 1,000 ppm TPH-d. A LUFT Manual Leaching Potential Analysis for the site determined that an acceptable limit of 10,000 ppm TPH-d was acceptable. Out of 36 soil samples, only one sample was above the 10,000 ppm level. It was recommended for the stockpiled soil to be spread onsite. The highest depth to groundwater at this site was approximately 127 feet bgs, with a trending flow direction to the north-northwest. The site remediation, commercial use of the property, and the depth to groundwater contributed towards a case closure. An NFA was granted by RCDEH on June 5, 1996 (RCDEH LOP Case #: 93929).</p>
54	ARCO AM/PM Mini Mart 23760 Temescal Canyon Road Corona, CA	Within 300 feet / southwest	CA FID UST, LUST, Cortese, SWEEPS UST, CERS, HAZNET, CERS TANKS, CERS HAZ WASTE, HWTS, RCRA NonGen / NLR, UST, EDR Hist Auto	<p>During the operation of the site by ARCO, a case was opened in August 1998 due to MTBE soil and groundwater contamination that was discovered during UST piping/dispenser upgrade activities (SWRCB 2021). Remediation activities consisted of HVDPE that removed approximately 252.3 lbs of TPH-g, 0.57 lbs benzene, 6.19 lbs MTBE, and 16,000 gallons of groundwater that was extracted and recycled offsite. In addition, four USTs were removed and replaced in 2003. Confirmation soil and groundwater samples showed non-detect levels for all contaminants with the exception of 33.3 ppb MTBE in MW-7 that was located on the north-end of the property near the USTs. An offsite monitoring well, MW-9, located adjacent to I-15, also showed non-detect levels for all contaminants. Depth to groundwater has ranged from 24 to 27 feet bgs with a flow toward the northeast. An NFA was granted by RCDEH on October 17, 2006 (RCDEH LOP Case #: 980750).</p>

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
55	Unnamed Site Temescal Canyon Road & I-15 Corona, CA	Within Project limits	ERNS	This site is listed on the ERNS database per the EDR Area/Corridor Report (EDR 2020a). No additional agency records were available for this site.
56	Rancho Serrano High School (now vacant property) Lawson Drive / Temescal Canyon Road Corona, CA	Within 300 feet / west-southwest	SCH, ENVIROSTOR	This site is approximately 51.5 acres and was previously proposed to be developed as a high school by the Corona-Norco Unified School District. The site is currently vacant and undeveloped. A Phase I Environmental Site Assessment was prepared in September 30, 2004 for the site and found no RECs in connection with the property (Kleinfelder 2004).
58	Hydro Conduit Corp (now vacant property) 23200 Temescal Canyon Road Corona, CA	Within 0.25 mile / east-northeast	RCRA-SQG, US AIRS, ICIS, CA FID UST, LUST, WDS, HIST CORTESE, NPDES, CIWQS, CERS, EMI, Cortese, UST, SWEEPS UST	During the operation of the site by CSR HydroConduit, a case was opened on September 23, 1998 due to soil contamination that was discovered during the removal of two USTs (SWRCB 2021). TPH-g, TPH-d, and BTEX were detected in soil samples collected from the former UST cavity. Remediation activities consisted of excavation and disposal of 610 tons of soil from the tank cavity area at a depth of 26 feet bgs. Groundwater was encountered at approximately 40 feet bgs. Confirmation soil and groundwater samples showed non-detect levels for all contaminants with the exception of MW-1 that had trace contaminants during Third Quarter 2000 sampling event. An NFA was granted by the RCDEH on November 7, 2001 (RCDEH LOP Case #: 9814820).
66	Wild Rose Development (now Wild Rose Ranch Community Association) Highway 15 (Near Clay Canyon) Corona, CA	Within 300 feet / southwest	LUST, Cortese, CERS	During the operation of the site by Wild Rose Development, a case was opened in 1990 due to soil and groundwater contamination that was discovered during the removal of two ASTs and a partially buried concrete tank (SWRCB 2021). The ASTs were disposed and the concrete tank was demolished and the concrete chunks were used as fill material at the site. Remediation activities consisted of excavation of 10,200 cubic yards of soil that was stockpiled onsite and the recovery of 1,479.6 gallons of free product diesel. After extensive soil characterization, the RCDEH approved the use of the stockpiled soil as road base and the area was subsequently paved. Depth to groundwater has ranged from 92.58 to 43.55 feet bgs, with a flow direction from north to northeast. Confirmation groundwater samples showed non-detect levels for all contaminants with the exception of TPH-d and naphthalene detected at 3,400 ppb and 2.53 ppb. The trace diesel residual contamination concentrations remaining beneath the site should not pose a threat to groundwater quality in this area per the RCDEH. An NFA was granted by the SARWQCB on July 20, 2004 (SARWQCB Case #: 083302058T).
68	Standard Ready Mix Concrete (now Materials Specialties Corporation and Gail Materials) 22300 Temescal Canyon Road Corona, CA	Within 0.25 mile / east-northeast	RCRA-SQG, HAZNET, HWTS, LUST, Cortese, WDS, HIST CORTESE, CA FID UST, CHMIRS, SWEEPS UST, US MINES, ABANDONED MINES, HIST UST, EMI, HAULERS, NPDES, CIWQS, CERS, FINDS, ECHO	During the operation of the site by Standard Concrete (Mobile Sand Facility), a case was opened on January 29, 1997 due to soil contamination that was discovered during the removal of three USTs. The contaminated soil was found underneath the dispenser islands at two feet bgs. Remediation activities consisted of soil excavation under the dispenser islands to four feet bgs. Confirmation soil samples showed non-detect levels for all contaminants with the exception of residual TPH-d remaining at 37 ppm. Groundwater depth was approximately 57 feet bgs. There was no evidence to suggest that groundwater had been impacted. An NFA was granted by the RCDEH on April 15, 1998 (RCDEH LOP Case #: 970291).

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
71	Villa Park Trucking (now Vaughan Trucking, LLC) 21880 Temescal Canyon Road Corona, CA	Within 300 feet / east-northeast	HIST UST, LUST, Cortese, UST, CIWQS, CERS, CA FID UST, HAZNET, SWEEPS UST, HAULERS, CERS HAZ WASTE, HWTS, RCRA NonGen / NLR	This site was formerly operated by Villa Park Trucking as a diesel truck repair. The property housed a diesel fueling station located along the north-central edge of the site. During the operation of the site by Villa Park Trucking, two 10,000-gallon USTs were removed in 1981 and one 15,000-gallon UST was removed in 2006. Soil and groundwater contaminated with diesel and VOCs were detected from sampling activities following the removal of the USTs. Historical depth to groundwater at the property ranged from 49.65 to 52.20 feet bgs, with an easterly flow direction towards Temescal Wash. No active remediation has taken place and all initial concentrations of contamination remain in-situ (<i>Case Closure Summary</i> , RCDEH LOP 2010). An NFA was granted by the RCDEH on September 16, 2010 (RCDEH LOP Case #: 200622897).
72	FST Sand & Gravel Inc. 21780 Temescal Canyon Road Corona, CA	Within 300 feet / east-northeast	RCRA NonGen / NLR, WDS, NPDES, CIWQS, CERS, CERS HAZ WASTE, US MINES	During routine site inspections in 2016 and 2017 by the RCDEH, minor site violations consisting of record keeping, annual staff safety training, weekly site inspection, labeling of containers, and failure to accumulate hazardous waste in a container that is in good condition were noted (EDR 2020a). All site violations were corrected.
76	Coronita Ranch Sand Deposit Corona, CA	Within Project limits	MINES MRDS	The primary commodity at the Coronita Ranch Sand Deposit is silica sand (USGS MRDS website, site accessed February 2021).
78	Cajalco Rd / I-15 Interchange Improvement Cajalco Road and Interstate 15 Corona, CA	Within Project limits	NPDES, CIWQS, CERS	This site had an NPDES permit in 2017 for construction storm water (EDR 2020a).
79	Liston Aluminum Brick Company (now unnamed site) 3710 & 20401 Temescal Canyon Road Corona, CA	Within 300 feet / east	SEMS, PRP, ECHO, VCP, HAZNET, ENVIROSTOR, NPDES, CIWQS, CERS, HWTS, SEMS-ARCHIVE, CPS-SLIC, LUST, WDS, Cortese, SWEEPS UST, HISTCORTESE	This site was formerly operated as a manufacturing site for bricks and other clay products. The site was developed by Liston Brick Company in the 1950s and was developed as Liston Aluminum Brick Company of Corona in 1975 (EnviroStor 2021). The site included an aluminum foundry. Soil contaminated with TPH, PAH, VOC, and metals were detected from the surface to 15 feet bgs during site investigation activities conducted from 1993 through 2009 (EnviroStor 2021). The source of the soil contamination was due to a LUST detected during the removal of two USTs on March 19, 1993 and from past site operation activities. All contaminated soils had been remediated through excavation and disposal activities (EnviroStor 2021). A case closure was granted by the RCDEH LOP on July 14, 1993 for the site investigation and remedial action associated with the USTs (RCDEH LOP Case # 93319). A Site Closure and NFA was granted by the DTSC on July 14, 2015 (DTSC Case #: 33330022). The site is now a construction laydown area owned by RCTC.
80	Liston Aluminum Company Site (now residential property) 9107 Cajalco Road Corona, CA	Within 1.0 mile / east	HIST Cal-Sites, ENVIROSTOR, RESPONSE, CERS	Approximately 25 tons of hazardous waste were deposited at Liston Aluminum Company Site in June 1984 (EnviroStor 2021). This material was sampled and found to contain hazardous levels of zinc and lead (EnviroStor 2021). The hazardous waste was removed from the property in November 1985 (DTSC Case #: 33330023).

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
84	Gateway Business Park (now Crossings at Corona) 20325 Temescal Canyon Road Corona, CA	Within 300 feet / northeast	CPS-SLIC, CHMIRS, ENVIROSTOR, CERS	This site is a former sand and clay mine reclamation site. Mining activities conducted at this site occurred as early as the 1950s. Contaminated groundwater consisting of low-level VOCs was detected in 2000 but may have originated from a localized source within refuse materials that were formerly buried at the site or from an offsite source. Concentrations were highest near the northern property boundary. Remediation activities consisted of a groundwater treatment system consisting of granular activated carbon adsorption and excavation. The site was graded with engineered fill and VOCs have not been detected in groundwater at the site since 2008. An NFA was granted on August 28, 2015 by the SARWQCB (GeoTracker ID #: T10000000196).
90	Corona Trucking Inc. (now Westrax Machinery / A.S.A.P. Heavy Equipment Rental) 19885 Temescal Canyon Road Corona, CA	Within 0.50 mile / northeast	HIST UST, LUST, NPDES, CIWQS, CERS, Cortese, HIST CORTESE	During the operation of the site by Corona Trucking Inc., soil contamination was discovered during the removal of a waste oil UST on May 20, 1991. Soil sampling results had determined soil located in the vicinity of a former wash rack and sump, located adjacent to the truck maintenance garage, was contaminated with diesel. The soil contamination was most likely the result of the steam cleaning of truck motors and equipment at the wash rack and from sump leakage. Upon completion of site investigation and remediation activities, including the removal of 400 cubic yards of diesel contaminated soils, an NFA was granted on November 19, 1992 by the RCDEH (RCDEH LOP Case #: 91447).
91	Wayside Dairy (now vacant property) 19630 Temescal Canyon Road Corona, CA	Within 0.50 mile / east-northeast	LUST, Cortese, CA FID UST, SWEEPS UST, HIST CORTESE, CERS, HIST UST	During the operation of the site by Wayside Dairy, a case was opened on December 11, 1991 for soil and groundwater contamination that was discovered during the removal of three 10,000 gallon USTs. Remediation activities have included excavation of 170 cubic yards of contaminated soils from the former tank cavity. Confirmation soil and groundwater samples showed non-detect levels for all contaminants with the exception of residual contamination around an inactive dispenser island, but it cannot be accessed without jeopardizing the structural integrity of the dispenser island and the canopy. All contaminant levels are extremely low and are far below the low risk criteria per the RCDEH. Groundwater depth ranged from approximately 12 to 20 feet bgs with a flow direction to the northeast. An NFA was granted by the RCDEH on August 17, 1998 (RCDEH LOP Case #: 92090).
92	76 Station 0522 19570 Temescal Canyon Road Corona, CA	Within 0.50 mile / east-northeast	LUST, Cortese, CERS	During the operation of this site by a 76 gas station, a case was opened on December 11, 1998 for soil and groundwater contamination that was discovered during the removal and replacement of two 10,000 gallon USTs and a single-walled fiberglass piping. Groundwater was observed in the tank cavity at approximately 17 feet bgs. Site investigations were conducted from 1998 to 2012. Approximately 137 cubic yards of soil was excavated and disposed in 2005. Monitoring well data collected between 2009 and 2012 showed residual fuel hydrocarbons detected in soil samples collected beneath the UST is not likely to represent a continued source to impact the shallow subsurface water encountered beneath the site (<i>Request for Site Closure</i> , Antea Group 2013). In addition, TPH-g, benzene, MTBE and TBA have been non-detect in groundwater. Historical groundwater depth ranged from approximately 15.16 to 20.83 feet bgs, with a flow direction to the east-northeast. An NFA was granted by the RCDEH on November 1, 2013 (RCDEH LOP Case #: 200824962).

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
93	El Cerrito ARCO (now Kim's Auto) 19501 Ontario Avenue Corona, CA	Within 0.50 mile / east-northeast	HAZNET, LUST, Cortese, HIST CORTESE, CERS	During the operation of the site by El Cerrito ARCO, a case was opened on December 12, 1991 for soil contamination that was discovered during the removal of four USTs. Remediation activities consisted of the excavation of soils that were stockpiled. The stockpiles naturally attenuated and were then spread onsite. Confirmation soil samples showed non-detect for all contaminants with the exception of approximately 25 cubic yards of TPH-g contaminated soil (370 ppm) left in place from 7 to 13 feet bgs. In addition, a vein of TPH-g contamination (380-5,100 ppm) at approximately 20 feet bgs appears to have resulted from an unknown offsite source that had migrated from across the street. Groundwater depth was approximately 30 feet bgs. Since the contamination that resulted from the tanks onsite was successfully remediated, an NFA was granted by the RCDEH on March 27, 1996 (RCDEH LOP Case #: 92143). The site contamination from the unknown offsite source may need to be dealt with in the future if the land use changes (<i>Case Closure Summary</i> , RCDEH 1996).
96	SCE Chase Substation 1390 E. Ontario Avenue Corona, CA	Within 0.25 mile / west-northwest	CPS-SLIC, CERS	In November 1986, a release of smudge pot oil was discovered during preliminary site screening conducted by SCE staff that had resulted in soil contamination. Site investigations conducted between 1987 and 1991 indicated subsurface soil beneath two former smudge pot ASTs had contained petroleum hydrocarbons as high as 32,400 mg/kg, with the highest concentrations found approximately between 10 and 30 feet bgs. Further investigation indicated the vertical extent of the impacted soil was approximately 80 feet bgs with a diameter of 50 feet wide, immediately beneath the former tank area. Groundwater was encountered at 133 feet bgs and was unaffected by the smudge pot oil release. Remediation activities had included installation of a bioventing remediation system, an extraction/injection remediation system, and soil excavation. Confirmation soil samples showed non-detect levels for TPH-d with the exception of one sample that contained TPH-d at a concentration of 448 mg/kg, which was below the 2,000 mg/kg target level that was agreed between SCE and SARWQCB staff. A case closure was granted by the SARWQCB on October 8, 1998 (SARWQCB Case #: SL208193874).
98	ARCO #5676 1402 E. Ontario Avenue Corona, CA	Within 300 feet / west-southwest	EDR Hist Auto, UST, LUST, Cortese, CERS, CERS TANKS, CERS HAZ WASTE, FINDS, RCRA NonGen / NLR, ECHO	During the operation of the site by ARCO, a case was opened in November 15, 1994 for soil contaminated with gasoline that was discovered from a LUST. The leak was stopped on the same day. A case closure was granted by the SARWQCB on March 27, 1996 (SARWQCB Case #: 083302616T). On August 26, 2016, UST vent lines were relocated. A soil sample was collected between the center vent pipes at two feet below the piping and the results were non-detect for all contaminants. No further sampling was required by the SARWQCB.

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
106	NW Corner Ontario Ave & State St (now Corona Cerrito Plaza) 1535 E. Ontario Avenue Corona, CA	Within 300 feet / east-northeast	CPS-SLIC, CERS	<p>In 2002, soil staining and a petroleum odor was discovered during rough grading operations at the commercially zoned site. Site investigations indicated the petroleum contamination was smudge pot oil. Groundwater was not encountered at 105 feet bgs. Remediation activities consisted of soil excavation of a 60 x 60 feet area, 10 feet bgs. Confirmation soil results showed the remediation work had achieved the cleanup goal for TPH (2,000 mg/kg). The SARWQCB granted a case closure on November 25, 2003.</p> <p>In 2005, soil staining with a hydrocarbon odor was discovered during site grading operations. Remediation activities consisted of soil excavation in two areas: Excavation Area #1 (58 x 28 feet, 15 feet bgs) and Excavation Area #2 (17 x 8 feet, four feet bgs). The location of a former SCE transformer station was also identified, which may have leaked from a 1997 explosion. Site investigations and health risk analyses were conducted. Stockpiled soils from excavation activities were below case closure cleanup goals and would be placed under the asphalt covered parking areas where no physical contact with contaminated soils will be possible. The excavation areas would be backfilled with clean fill material. The leave-in-place concentrations had been evaluated for site specific health risk exposure pathways and were considered to be safe given the development proposed. No PCBs were ever detected in any soil sample. A case closure was granted by the RCDEH on May 11, 2005 (RCDEH LOP Case #: CO0020854).</p>
108	NWC of Ontario and State (now TLC 4 Kids) 1585 E. Ontario Avenue Corona, CA	Within 0.25 mile / east	CPS-SLIC, CERS	<p>On February 26, 2003, soil contaminated with heating oil/fuel oil was discovered during site grading operation activities by Peninsula Retail Development Property. The source of the contamination was from past smudge oil pots that were stored in the area and had been removed long ago. Remediation activities consisted of excavation and disposal of impacted soils with TPH in excess of 2,000 mg/kg to a depth of 10 feet bgs. Confirmation soil results showed the remediation activities had achieved SARWQCB's cleanup goal and that only low concentrations of TPH remained. An NFA was granted by the SARWQCB on November 25, 2003 (GeoTracker ID #: SL0606518660).</p>
110	Southern California Edison 2000 Compton Avenue Corona, CA	Within 300 feet / west	CPS-SLIC, CERS	<p>During the operation of the site by SCE, a case was opened on June 2, 1992 for site contamination associated with petroleum fuel and oil. Upon completion of site investigation and remediation activities, a case closure was granted by the SARWQCB on June 1, 1999 (SARWQCB Case #: SLT8R042)</p>
121	Shell Magnolia Corona 1205 Magnolia Avenue Corona, CA	Within 0.50 mile / northwest	LUST, Cortese, CERS, CDL	<p>During the operation of the site by Shell, a case was opened in 1991 for soil and groundwater contamination that was discovered during UST system testing. The soil and groundwater were contaminated with petroleum hydrocarbons, and the source of the contamination was from a leak in the flex connector at the turbine. The product piping and dispensers were upgraded in 2002. Remediation activities consisted of excavation of 482 tons of soil and implementation of a soil vapor extraction system. Historical depth to groundwater ranged from 105 to 116 feet bgs, with a flow direction from northwest to southwest, but has been predominately to the southwest. Confirmation soil and groundwater samples showed residual contamination remaining including MTBE (up to 13 ppb) and perchlorate (up to 17 ppb) in groundwater and TPH-g (up to 3.7 ppm) in soil. An NFA was granted by the RCDEH on May 11, 2009 (RCDEH LOP Case #: 91850).</p>

Table 7-8. Agency Records Review for Environmental Data Resources Identified Sites

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Agency Records Review
125	Downs Oil Co. Inc. 1296 Magnolia Avenue Corona, CA	Within 0.25 mile / north	FUELS PROGRAM, UST, EMI, LUST, Cortese, CERS, HIST CORTESE, HAZNET, CHMIRS, HWTS	During the operation of the site by Down's Oil, a case was opened on May 12, 1997 for soil contamination that was discovered during sampling activities in the vicinity of two large diesel USTs. The soil sampling activities were being conducted as part of the UST abandonment-in-place process. The soil samples revealed elevated TPH-d concentrations (up to 4,967 ppm), but BTEX was non-detect. It was estimated the volume of impacted soil was approximately 1,200 cubic yards with a depth ranging from 41 to 54 feet bgs. Groundwater sampling results were non-detect for BTEX; however, TPH-d and MTBE were detected and found to be decreasing overtime. The highest concentration of TPH-d in groundwater was 9,300 ppb and was reduced to 1,500 ppb, and for MTBE the highest concentration was 29 ppb and was reduced to non-detect levels. Groundwater depth ranged from approximately 34.92 to 38.48 feet bgs, with a flow direction to the north. An NFA was granted by the RCDEH on November 29, 1999 (RCDEH LOP Case #: 970639).
127	Corona Cross Roads (now undeveloped property) N/A Sherborn Street Corona, CA	Within 0.50 mile / east-northeast	CPS-SLIC, CERS	According to an NFA letter (SARWQCB 1999), a Phase I ESA was previously prepared for the Corona Crossroads site for the purchase of real property. The site has historically been undeveloped land. Monitoring wells were installed upgradient and downgradient of the site by the County of Riverside to monitor the former Corona Sanitary Landfill. Occasionally the monitoring wells detected some metals and halogenated VOCs, but not at concentrations of concern. The SARWQCB does not believe these contaminants have adversely impacted groundwater underlying the site and had concurred with the findings of the Phase I ESA that no further action for investigation of soil or groundwater at the site was necessary. An NFA was granted by the SARWQCB on April 2, 1999 (SARWQCB Case #: SLT8R126).
128	Sherborn Magnolia Drum Site Sherborn Street and Magnolia Avenue Corona, CA	Within 0.50 mile / north-northeast	SEMS, PRP	This site is not listed on the NPL database and no site assessment work is needed (EDR 2020a). The potentially responsible party is listed as W-H TANKLINES (EDR 2020a). No additional agency records were available for this site.

8 Environmental Consequences

8.1 Sites of Concern

Based on the analyses performed as part of this ISA, facilities are located within and adjoining to the Project limits that handle, use, and/or store hazardous waste/materials/substances. However, no handling, use, or storage of hazardous waste/materials/Substances are currently conducted within the Project limits.

8.1.1 Project Limits

Eight hazardous material sites are associated with the Project limits; however, they are not considered RECs based on the proposed I-15 ELPSE work, the current conditions and available information in the environmental databases searched, review of historical land use information, field reconnaissance, and records reviewed on the SWRCB GeoTracker and DTSC EnviroStor databases and the EDR Area/Corridor Report. Additional information pertaining to these eight sites are provided in Table 8-1.

8.1.2 Adjoining Properties

There are 92 hazardous material sites that are located within the ISA Study Area that adjoin the Project limits, as listed in Table 7-1, but only 18 adjoining sites were listed on databases that indicate release incidents or mining activity (i.e. LUST, ENVIROSTOR, VCP, RESPONSE, SEMS, Cortese, PRP, CPS-SLIC, MINES, US MINES, ABANDONED MINES, and MINES MRDS) that may have occurred on the property. These 18 sites are not considered RECs based on the proposed I-15 ELPSE work, the current conditions and the available information in the environmental database searched, review of historical land use information, field reconnaissance, and records reviewed on the SWRCB GeoTracker and DTSC EnviroStor databases and the EDR Area/Corridor Report. Additional information pertaining to these 18 sites are provided in Table 8-1.

The review of historical aerial photographs and topographic maps had identified one former mining site located within the ISA Study Area that adjoin the Project limits, and four former mining sites that are located adjacent to the ISA Study Area. The approximate location of these mining sites are as follows:

- Former Mining Site No. 1 – East of I-15, near the LATRICRETE property (22740 Temescal Canyon Road, Corona, CA). Site is located adjacent to the ISA Study Area.
- Former Mining Site No. 2 – East of I-15, where The Shops at Dos Lagos (2780 Cabot Drive, Corona, CA) is located. Site is located adjacent to the ISA Study Area.
- Former Mining Site No. 3 – East of I-15, where the Crossings at Corona (2470 Tuscany Street, Corona, CA) is located. Site is located adjacent to the ISA Study Area.
- Former Mining Site No. 4 – East of I-15, extending from the Project limits to the intersection of Bel Air Street and State Street in the City of Corona. Site is located within the ISA Study Area.
- Former Mining Site No 5. – East of I-15, approximately 1,000 feet northeast from the intersection of I-15 / Old Temescal Road in the City of Corona. Site is located adjacent to the ISA Study Area.

Project-related excavation activities, including those associated with bridge widenings and the construction of retaining walls, would not occur at these former mining sites. Hazardous waste/material sites adjoining the Project limits are not anticipated to pose a risk to the proposed Project.

Table 8-1. Summary of Impacts

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Site Information	Potential Impacts on the Project	REC	Risk Ranking
6	7-Eleven Inc. #36788 515 N. Main Street Lake Elsinore, CA	Within 300 feet / west	EDR Hist Auto, HAZNET, CERS, CERS TANKS, CERS HAZ WASTE, HWTS, RCRA NonGen / NLR, CA FID UST, HIST UST, SWEEPS UST, UST, LUST, Cortese	This site is a 7-Eleven gas station. Four pump stations, a chemical placard, a clean air scrubber AST, and 5-gallon propane tanks were located onsite. During the operation of the site by a 76 gas station, a case was opened in September 2000 for soil and groundwater contaminated with petroleum hydrocarbons that was discovered during UST fuel system upgrade activities (SWRCB 2021). Upon completion of site investigation and remediation activities, a case closure was granted on July 15, 2014 (RCDEH LOP Case #: 200117545).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
7	Unocal #2757 1095 Main Street N. Lake, CA	Within Project limits	RGA LUST	This site was not found during field reconnaissance. According to the SWRCB UST Cleanup Fund Priority List (dated June 29, 2012), UNOCAL #2757 at 1095 Main Street is located in the City of Lakeport and not in the City of Lake Elsinore.	This site is located in the City of Lakeport and not in the City of Lake Elsinore. No ROW acquisition would be required of this site. There is no risk to the Project associated with this site.	No	None
8	City of Lake Elsinore Corporate Yard 521 Langstaff Street Lake Elsinore, CA	Within 300 feet / southwest	LUST, HIST CORTESE, HIST UST, HAZNET, CERS, CERS HAZ WASTE, HWTS, RCRA NonGen / NLR, Cortese	This site is a maintenance yard. A chemical placard was located on the granted front entrance. No other indication of chemicals was seen onsite that would indicate a spill or release. This site has been operated by the City of Lake Elsinore as a maintenance yard since the early 1900s. In 1987, a case was opened for soil contaminated with petroleum hydrocarbons that was discovered during a routine UST inspection. Upon completion of site investigation and remediation activities, a case closure was granted on May 3, 1989 (RCDEH LOP Case #: 88062).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
10	Laidlaw Transit (now Steve's Towing) 609 Minthorn Street Lake Elsinore, CA	Within 300 feet / west-southwest	LUST, Cortese, CERS, RCRA NonGen / NLR, HIST UST, HIST CORTESE, RCRA-SQG, FINDS, ECHO	This site is an automotive towing and recovery company. No outward signs of hazardous substances were on the property. During the operation of the site by Laidlaw Transit, a case was opened on March 2, 1988 for soil contamination that was discovered during closure of a UST. The soil was contaminated with heating oil/fuel oil and the cause of the contamination was due to corrosion of the tank. A case closure was granted on April 4, 1989 (SARWQCB Case #: 083300978T).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low

Table 8-1. Summary of Impacts

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Site Information	Potential Impacts on the Project	REC	Risk Ranking
11	Rightway 653 W. Minthorn Street Lake Elsinore, CA	Within 300 feet / southwest	RCRA NonGen / NLR, FINDS, ECHO, HIST UST, LUST, Cortese, HIST CORTESE, CERS, CERS HAZ WASTE	This site is a portable toilet service company. A chemical placard was located on the gated front entrance, and a monitoring well cover was located east of the gated front entrance. During the operation of the site by Rightway Portable Toilets, a case was open on July 24, 1986 for soil contamination that was discovered during a UST tank tightness test. The soil was contaminated with gasoline. A case closure was granted on April 4, 1989 (SARWQCB Case #: 083300324T).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
27	ARCO #5618 29355 Central Avenue Lake Elsinore, CA	Within 300 feet / north-northeast	LUST, RCRA-SQG, FINDS, ECHO, UST, CHMIRS, CA FID UST, HAZNET, Cortese, SWEEPS UST, CERS, HWTS, RCRA NonGen / NLR, EDR Hist Auto, CERS TANKS, CERS HAZ WASTE	This site is an ARCO gas station. Six pump islands, a clean air scrubber AST, 5-gallon propane tanks, and two 55-gallon metal drums with hazardous waste labels were seen onsite. A monitoring well cover was also seen near the clean air scrubber AST. During the operation of the site by ARCO, a case was opened on November 22, 2002 for soil and groundwater contamination that was discovered during UST fuel system upgrade activities (SWRCB 2021). Soil contamination was non-detect and groundwater contamination was non-detect except for bromodichlorom ethane (0.46J), chloroform (0.49J), and dibromochlorom ethane (0.57J) per sampling activities in 2009 (<i>Case Closure Summary</i> , RCDEH LOP 2010b). Active remediation was not required to restore or protect groundwater quality based on groundwater monitoring data collected. A case closure was granted on June 1, 2010 (RCDEH LOP Case #: 200319347).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
32	Unnamed Site Nichols Rd at I-15 Lake Elsinore, CA	Within Project limits	CHMIRS	This site is the Nichols Road / I-15 interchange. A construction laydown area was seen adjacent to the NB I-15 Nichols Road on-ramp. A spill incident had occurred on October 3, 1996 that involved 20 lbs of drug lab waste on the road at Nichols Street / I-15 (EDR 2020a). The spill incident was found by a sheriff deputy while on patrol. No additional agency records were available for this site.	No open cases involving LUSTs or spills are associated with this property. Although there are no open cases, precaution should be taken for encountering unexpected or unknown contaminants during soil disturbance activities. A HASP, CMMP, and CCP will be prepared for the Project that will outline specific procedures for encountering expected and unexpected contaminants to protect worker health and safety. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low

Table 8-1. Summary of Impacts

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Site Information	Potential Impacts on the Project	REC	Risk Ranking
33	Nichols Canyon Mine (now Chandler Aggregates Inc.) 10000 Nichols Road Lake Elsinore, CA	Within 300 feet / northeast	MINES	The Nichols Canyon Mine comprises approximately 199 acres located both north and south of Nichols Road, east of I-15. The site at 10000 Nichols Road is an active mining site for sand and gravel and includes Chandler Aggregates Inc. as a mining operator. A chemical placard was seen on the front entrance gate. No other indication of chemicals was seen onsite that would indicate a spill or release.	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
34	Bridge Maintenance on I-15 PM 25.55 Over Gavillon Wash Project (now Gavillon Wash Bridge) I-15 PM 25.55 Lake Elsinore, CA	Within Project limits	CERS, CIWQS	This site is the Gavillon Wash Bridge. No bridge maintenance work or outward signs of hazardous materials were seen to be stored on the property. This site had a Section 401 Certification between 2015 and 2020 for the discharge of dredge and fill material (EDR 2020a).	No open cases involving LUSTs or spills are associated with this property. Although there are no open cases, precaution should be taken for encountering unexpected or unknown contaminants during soil disturbance activities. A HASP, CMMP, and CCP will be prepared for the Project that will outline specific procedures for encountering expected and unexpected contaminants to protect worker health and safety. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
35	WYROC Lake Street Quarry (now vacant and for sale/lease property) 31000 Lake Street Lake Elsinore, CA	Within 300 feet / south	MINES, CERS	The WROC Lake Street Quarry site is a mining site that is vacant and fenced-off and currently in progress to be reclaimed by Lake Street Properties L.P (EDR 2020a). A portion of the site is designated for future development, including approximately 1.0-1.5 acres designated for sale or lease to become a gas station/fast food establishment. Heavy construction equipment, including an excavator, a chemical placard mounted on the fence, three 55-gallon metal drums, and an IBC were seen on the property. A spoil pile was also seen on the southern-end of the property.	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
36	Unnamed Site NB I-15 Lake Street On-Ramp Lake Elsinore, CA	Within Project limits	CHMIRS	This site is the NB I-15 Lake Street on-ramp. No outward signs of hazardous materials were seen to be stored on the property. A release/spill incident was reported on February 19, 1988 (EDR 2020a). No additional agency records were available for this site.	No open cases involving LUSTs or spills are associated with this property. In addition, no soil disturbance activities are associated with the NB I-15 Lake Street on-ramp. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low

Table 8-1. Summary of Impacts

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Site Information	Potential Impacts on the Project	REC	Risk Ranking
37	Pacific Clay Products 14741 Lake Street Lake Elsinore, CA	Within 300 feet / south	MINES, ABANDONED MINES, US MINES, RCRA NonGen / NLR, HIST UST, UST, RCRA-SQG, US AIRS, ICIS, CA FID UST, EMI, LUST, Cortese, WDS, SWEEPS UST, HIST CORTESE, ENF, CERS, AST, HAZNET, CERS TANKS, CERS HAZ WASTE, HWTS, FINDS, ECHO, SEMS-ARCHIVE	This site is an active clay mine and brick/brick products manufacturing facility that is operated by Pacific Clay Products. The mailing address for the site is 14741 Lake Street. A chemical placard mounted on the gated front entrance and a pole-mounted transformer were seen onsite. The northern portion of the site contains the processing equipment (including kilns) for manufacturing clay products, and the southern portion of the site contains the clay mines and mixing pads. Three 10,000 gallon USTs were removed at three locations (Areas, 1, 2, and 3) on July 15, 1998 and each site had petroleum hydrocarbon soil contamination. Upon completion of site investigation and remediation activities, a case closure was granted on September 8, 2000 for Area 1 (RCDEH LOP Case #: 980655) and a case closure was granted on March 23, 1999 for both Areas 2 and 3 (RCDEH LOP Case #: 980657).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
49	Indian Truck Trail I-15 Interchange Temescal Canyon to Campbell Ranch Road Lake Elsinore, CA	Within Project limits	CIWQS	This site is the Indian Truck Trail / I-15 interchange. No outward signs of hazardous materials were seen to be stored on the property. This site had no site violations or enforcement actions listed in the EDR Area/Corridor Report (EDR 2020a). No additional agency records were available for this site.	No open cases involving LUSTs or spills are associated with this property. Although there are no open cases, precaution should be taken for encountering unexpected or unknown contaminants during soil disturbance activities. A HASP, CMMP, and CCP will be prepared for the Project that will outline specific procedures for encountering expected and unexpected contaminants to protect worker health and safety. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
54	ARCO AM/PM Mini Mart 23760 Temescal Canyon Road Corona, CA	Within 300 feet / southwest	CA FID UST, LUST, Cortese, SWEEPS UST, CERS, HAZNET, CERS TANKS, CERS HAZ WASTE, HWTS, RCRA NonGen / NLR, UST, EDR Hist Auto	This site is an ARCO AM/PM gas station. Six pump islands, a clean air scrubber AST, two 55-gallon metal drums with a hazardous waste label, 5-gallon propane tanks, and a pad-mounted transformer were seen onsite. During the operation of the site by ARCO, a case was opened in August 1998 due to MTBE soil and groundwater contamination that was discovered during UST piping/dispenser upgrade activities (SWRCB 2021). Upon completion of site investigation and remediation activities, a case closure was granted on October 17, 2006 (RCDEH LOP Case #: 980750).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low

Table 8-1. Summary of Impacts

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Site Information	Potential Impacts on the Project	REC	Risk Ranking
55	Unnamed Site Temescal Canyon Road & I-15 Corona, CA	Within Project limits	ERNS	This site is the Temescal Canyon Road / I-15 interchange. No outward signs of hazardous materials were seen to be stored on the property. This site is listed on the ERNS database per the EDR Area/Corridor Report (EDR 2020a). No additional agency records were available for this site.	No open cases involving LUSTs or spills are associated with this property. Although there are no open cases, precaution should be taken for encountering unexpected or unknown contaminants during soil disturbance activities. A HASP, CMMP, and CCP will be prepared for the Project that will outline specific procedures for encountering expected and unexpected contaminants to protect worker health and safety. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
56	Rancho Serrano High School (now vacant property) Lawson Drive / Temescal Canyon Road Corona, CA	Within 300 feet / west-southwest	SCH, ENVIROSTOR	This site is approximately 51.5 acres and was previously proposed to be developed as a high school by the Corona-Norco Unified School District. The site is currently vacant and undeveloped. A Phase I Environmental Site Assessment was prepared in September 30, 2004 for the site and found no RECs in connection with the property (Kleinfelder 2004).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
66	Wild Rose Development (now Wild Rose Ranch Community Association) Highway 15 (Near Clay Canyon) Corona, CA	Within 300 feet / southwest	LUST, Cortese, CERS	This site is a residential community with a park. A pad-mounted transformer was seen onsite. During the operation of the site by Wild Rose Development, a case was opened in 1990 due to soil and groundwater contaminated with diesel that was discovered during the removal of two ASTs and a partially buried concrete tank (SWRCB 2021). The ASTs were disposed and the concrete tank was demolished and the concrete chunks were used as fill material at the site. Remediation activities included excavation of 10,200 cubic yards of soil that was stockpiled onsite. After extensive soil characterization, the RCDEH approved the use of the stockpiled soil as road base and the area was subsequently paved. A case closure was granted on July 20, 2004 (SARWQCB Case #: 083302058T).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low

Table 8-1. Summary of Impacts

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Site Information	Potential Impacts on the Project	REC	Risk Ranking
71	Villa Park Trucking (now Vaughan Trucking, LLC) 21880 Temescal Canyon Road Corona, CA	Within 300 feet / east-northeast	HIST UST, LUST, Cortese, UST, CIWQS, CERS, CA FID UST, HAZNET, SWEEPS UST, HAULERS, CERS HAZ WASTE, HWTS, RCRA NonGen / NLR	This site is gated and provides trucking and supply of aggregate products. No indications of hazardous substances were on the property. During the operation of the site by Villa Park Trucking, soil and groundwater contaminated with diesel and VOCs were detected from sampling activities following the removal of USTs in 1981 and 2006. A case closure was granted on September 16, 2010 (RCDEH LOP Case #: 200622897).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
72	FST Sand & Gravel Inc. 21780 Temescal Canyon Road Corona, CA	Within 300 feet / east-northeast	RCRA NonGen / NLR, WDS, NPDES, CIWQS, CERS, CERS HAZ WASTE, US MINES	This site is gated and provides trucking and supply of aggregates, including concrete and asphalt aggregates, and sand materials. A chemical placard was seen onsite. During routine site inspections in 2016 and 2017 by the RCDEH, minor site violations consisting of record keeping, annual staff safety training, weekly site inspection, labeling of containers, and failure to accumulate hazardous waste in a container that is in good condition were noted (EDR 2020a). All site violations were corrected.	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
76	Coronita Ranch Sand Deposit Corona, CA	Within Project limits	MINES MRDS	This site was not found during field reconnaissance. The primary commodity at the Coronita Ranch Sand Deposit site is silica sand (USGS MRDS website, site accessed February 2021). A review of historical aerials and topographic maps do not indicate mining activities had occurred within the Project limits.	Silica sand is not a CERCLA hazardous substance but can be toxic if made airborne and inhaled. Although there are no clear documentation of the presence or absence of silica sand within the Project limits, precaution should be taken if this material is encountered during soil disturbance activities such as intrusive geotechnical investigations. A HASP, CMMP, and CCP will be prepared for the Project that will outline specific procedures for encountering expected and unexpected contaminants, including silica sand, to protect worker health and safety. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low

Table 8-1. Summary of Impacts

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Site Information	Potential Impacts on the Project	REC	Risk Ranking
78	Cajalco Rd / I-15 Interchange Improvement Cajalco Road and Interstate 15 Corona, CA	Within Project limits	NPDES, CIWQS, CERS	This site was previously under construction for the Cajalco Road / I-15 Interchange Improvement Project and had an NPDES permit in 2017 for construction storm water (EDR 2020a). Construction of the project was completed in 2019.	No open cases involving LUSTs or spills are associated with this property. Although there are no open cases, precaution should be taken for encountering unexpected or unknown contaminants during soil disturbance activities. A HASP, CMMP, and CCP will be prepared for the Project that will outline specific procedures for encountering expected and unexpected contaminants to protect worker health and safety. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
79	Liston Aluminum Brick Company (now unnamed site) 3710 & 20401 Temescal Canyon Road Corona, CA	Within 300 feet / east	SEMS, PRP, ECHO, VCP, HAZNET, ENVIROSTOR, NPDES, CIWQS, CERS, HWTS, SEMS-ARCHIVE, CPS-SLIC, LUST, WDS, Cortese, SWEEPS UST, HIST CORTESE	This site is located at the southwest intersection of Cajalco Road and Temescal Canyon Road and is currently used as a construction laydown area owned by RCTC. During the operation of the site by Liston Aluminum Brick Company, soil contaminated with TPH, PAH, VOC, and metals were detected from the surface to 15 feet bgs during site investigation activities conducted from 1993 through 2009 (EnviroStor 2021). The source of the soil contamination was due to a LUST detected during the removal of two USTs on March 19, 1993 and from past site operation activities. A case closure was granted on July 14, 1993 for the completion of site investigation and remedial action associated with the USTs (RCDEH LOP Case # 93319). In addition, a Site Closure and NFA was granted by the DTSC on July 14, 2015 (DTSC Case #: 33330022).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low

Table 8-1. Summary of Impacts

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Site Information	Potential Impacts on the Project	REC	Risk Ranking
84	Gateway Business Park (now Crossings at Corona) 20325 Temescal Canyon Road Corona, CA	Within 300 feet / northeast	CPS-SLIC, CHMIRS, ENVIROSTOR, CERS	This site is a commercial retail shopping center but was formerly a sand and clay mine reclamation site. Mining activities conducted at this site occurred as early as the 1950s. Contaminated groundwater consisting of low-level VOCs was detected in 2000 but may have originated from a localized source within refuse materials that were formerly buried at the site or from an offsite source. Concentrations were highest near the northern property boundary. Remediation activities consisted of a groundwater treatment system consisting of granular activated carbon adsorption and excavation. The site was graded with engineered fill and VOCs have not been detected in groundwater at the site since 2008. A case closure was granted on August 28, 2015 (GeoTracker ID #: T10000000196).	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low.	No	Low
98	ARCO #5676 1402 E. Ontario Avenue Corona, CA	Within 300 feet / west-southwest	EDR Hist Auto, UST, LUST, Cortese, CERS, CERS TANKS, CERS HAZ WASTE, FINDS, RCRA NonGen / NLR, ECHO	This site is an ARCO AM/PM gas station with a carwash facility. Six pump stations and 5-gallon propane tanks were located onsite. Two monitoring wells are also located near the carwash exit. During the operation of the site by ARCO, a case was opened in November 15, 1994 for soil contaminated with gasoline that was discovered from a LUST. The leak was stopped on the same day. A case closure was granted on March 27, 1996 (SARWQCB Case #: 083302616T). On August 26, 2016, UST vent lines were relocated. A soil sample was collected between the center vent pipes at two feet below the piping and the results were non-detect for all contaminants. No further sampling was required by the SARWQCB.	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low

Table 8-1. Summary of Impacts

Site ID ^a	Site Name / Address	Distance/Direction from Project Limits	Database(s) ^b	Site Information	Potential Impacts on the Project	REC	Risk Ranking
106	NW Corner Ontario Ave & State St (now Corona Cerrito Plaza) 1535 E. Ontario Avenue Corona, CA	Within 300 feet / east-northeast	CPS-SLIC, CERS	<p>This site is a commercial shopping plaza. In 2002, soil staining and a petroleum odor was discovered during rough grading operations at the commercially zoned site. Site investigations indicated the soil contamination was smudge pot oil. Upon completion of site investigation and remediation activities, a case closure was granted on November 25, 2003.</p> <p>In 2005, soil staining with a hydrocarbon odor was discovered during site grading operations. The location of a former SCE transformer station was also identified, which may have leaked from a 1997 explosion. Site investigations and health risk analyses were conducted. Stockpiled soils from excavation activities were below case closure cleanup goals and would be placed under the asphalt covered parking areas where no physical contact with contaminated soils will be possible. The excavation areas would be backfilled with clean fill material. The leave-in-place concentrations had been evaluated for site specific health risk exposure pathways and were considered to be safe given the development proposed. No PCBs were ever detected in any soil sample. A case closure was granted on May 11, 2005 (RCDEH LOP Case #: CO0020854).</p>	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low
110	Southern California Edison 2000 Compton Avenue Corona, CA	Within 300 feet / west	CPS-SLIC, CERS	This site was not found during field reconnaissance. During the operation of the site by SCE, a case was opened on June 2, 1992 for site contamination associated with petroleum fuel and oil. Upon completion of site investigation and remediation activities, a case closure was granted on June 1, 1999 (SARWQCB Case #: SLT8R042)	No ROW acquisition would be required of this site, and no open cases involving LUSTs or spills are associated with this property. The risk ranking for this site is considered to be low and a PSI is not warranted.	No	Low

Notes:

This page is intentionally blank.

8.2 Other Conditions of Concern

This section contains environmental conditions that were identified for the proposed Project that are not considered RECs, as they are not included in the ASTM process, but may be encountered during construction activities and will require further attention during construction or additional investigation. These environmental conditions are often encountered on Caltrans projects that are relevant to Caltrans evaluation of environmental conditions, as specified in the Caltrans ISA Guidance Document (2006b).

8.2.1 Aerially-Deposited Lead

Due to historical use of lead in gasoline, lead may exist in soils near heavily traveled roadways. This specific type of lead contamination is referred to as ADL. Sampling by Caltrans throughout the state has shown that ADL is present in soil along major roadway routes resulting from automobile exhaust containing lead from leaded gasoline. Elevated lead concentrations are generally found within 6 feet of the edge of pavement and within the top 6 inches of soil. Elevated lead concentrations can also be present as deep as 2 to 3 feet below the surface. The concentration and distribution of ADL in soil is dependent on many variables, but in general, traffic volumes and age of the roadway are the primary factors.

The United States Environmental Protection Agency began to require gasoline to be unleaded beginning in 1973, and leaded gas was phased out entirely by 1996 for automobiles. The presence of ADL in soils does not necessarily pose a threat in its current state. However, it is considered to have the potential to impact the environment and workers on site during construction activities, as well as affect disposal methods if soils cannot be reused and must be moved offsite.

As stated earlier, a review of the I-15 ELPSE Aerially Deposited Lead Analysis (EA 08-0J0820) (Leighton 2021) was conducted as part of this ISA. Based on the ADL Survey data and statistical analysis, the soil within the Project limits, including the median, shoulders, and ramps, does not represent a significant environmental or health hazards and, according to the DTSC variance issued to Caltrans, can be classified as unregulated Type X soil, non-hazardous, and can be reused on site without restriction. Per the soil reuse agreement, a LCP is required for worker safety.

8.2.2 Asbestos-Containing Material

Asbestos was commonly used in many building materials prior to 1978 and may have been used up until the early 1980s. ACM includes fireproofing, acoustic ceiling material, transite pipe, roofing materials, thermal insulation, support piers, expansion joint material in bridges, asphalt, concrete, and other building materials. It is of primary concern when it is friable (i.e., material that can be easily crumbled). Asbestos is still used in building materials today, though its use is uncommon due to the associated hazards.

The proposed Project would require widening of 14 bridges on both the NB and SB sides of the I-15, between Nichols Road and Cajalco Road in the cities of Lake Elsinore and Corona, as listed in Table 7-5. No other bridge structures or building structures would be disturbed by the proposed Project. ACM surveys of the 14 bridges were conducted for the proposed Project in 2020. ACM is present in the gray felt pad along the SB and NB Brown Canyon Wash Bridge and Weirick Road Undercrossing Bridge inner guard rails and may be impacted by the proposed Project. In addition, there is a potential for all 14 bridges to contain ACMs in areas that have not been sampled (A-Tech 2020).

8.2.3 Lead-Based Paint

Regulatory actions restricted the amount of lead in paints and primers manufactured after January 1, 1978 and limited the uses of paints in areas where consumers would have direct access to painted surfaces in non-industrial facilities. Prior to 1978, LBP may have been used in construction or maintenance of building and road structures, including bridges. Other sources of LBP include painted curbs, utility poles, and roadway striping.

The proposed Project would require widening of 14 bridges on both the NB and SB sides of the I-15, between Nichols Road and Cajalco Road in the cities of Lake Elsinore and Corona, as listed in Table 7-5. No other bridge structures or building structures would be disturbed by the proposed Project. LBP surveys of the 14 bridges were conducted for the proposed Project in 2020. LBP is present in the light gray paint on the railing of NB Temescal Wash Bridge and in the yellow lane surface paint at NB Indian Wash Bridge and may be impacted by the proposed Project. In addition, there is a potential for all 14 bridges to contain LBP in areas that have not been sampled (A-Tech 2020).

8.2.4 Treated Wood Waste

Wooden utility poles, road signs, thrie beam barrier, piles, and railroad ties, as well as wood used to support metal beam guardrails, may contain preserving chemicals that protect against insects and fungal decay. These chemicals, which may be hazardous, include creosote and pentachlorophenol, and treatment compounds such as copper azole, alkaline copper quaternary, chromate copper arsenate, and other associated compounds. Wooden guardrail posts are located within the Project limits and may contain creosote and pentachlorophenol.

8.2.5 Paint and Thermoplastic Striping

Historically, chrome yellow (containing lead chromate) was used as the primary yellow pigment in traffic lane PTS. Lead chromate varied from approximately 3.5 percent by weight in yellow waterborne paint to 25 percent by weight in yellow epoxy. In California, lead chromate traffic striping was phased out in waterborne traffic paint between 1997 and 2000 and in thermoplastic striping by 2004. The concentrations of lead chromate in the PTS applied to roadways would classify waste PTS as hazardous. Given the recent phase out of lead chromate containing PTS, it is generally assumed that existing yellow PTS associated with roadway markings within a given Caltrans construction project area contains lead and chromium, unless it has been demonstrated that lead or chromium are not present (i.e. analytical data or definitive identification of the PTS source material). Therefore, a potential exists for hazardous thermoplastic striping to be present within the Project limits.

8.3 Construction Impacts

Construction of the proposed Project would require the use of hazardous substances and may generate hazardous waste. Usage of hazardous materials and generation of hazardous waste are considered a short-term construction impact. Examples of hazardous materials likely to be used during construction of the proposed Project include lubricants (both grease and oils), petroleum fuels, cleaning solvents, and paint. Hazardous wastes generated during construction of the proposed Project would require disposal and could include used oil (not hazardous) and sediment from vehicle washing.

Potential impacts from construction-related hazardous waste and materials would be addressed through implementation of a Storm Water Pollution Prevention Plan (SWPPP). The SWPPP would be developed in compliance with the National Pollutant Discharge Elimination System (NPDES) general construction permit and would include Best Management Practices to address potential impacts related to the use and potential discharge of construction-related hazardous waste and materials.

This page is intentionally blank.

9 Data Gaps

In general, a Data Gap is the inability to gather information as prescribed in the ASTM Standard despite good faith efforts. This may include, but not be limited to, a lack of historical information, inability to interview knowledgeable individuals, or inspect portions of the Project limits. The following data gaps were identified for this ISA:

- Absence of interviews

The absence of interviews with persons knowledgeable about the Project limits does not appear to present a significant data gap because of the availability of site records maintained by the SWRCB GeoTracker and DTSC EnviroStor databases, the EDR Area/Corridor Report, and other supporting historical information.

This page is intentionally blank.

10 Findings

Based on the definition of a REC in ASTM E1527-13, no RECs have been identified for the proposed Project that may warrant additional investigation. However, the following environmental conditions have been identified for the proposed Project that are not considered RECs, as they are not included in the ASTM process, but may be encountered during construction activities and will require further attention during construction or additional investigation.

- Hazardous Material Sites within Project Limits – Although no open cases involving LUST or spills were identified within the Project limits, there is a potential for encountering unexpected or unknown contaminants during soil disturbance activities at six hazardous material sites, they are: Nichols Road / I-15 interchange (Site #32), Gavilon Wash Bridge (Site #34), Indian Truck Trail / I-15 interchange (Site #49), Temescal Canyon Road / I-15 interchange (Site #55), Coronita Ranch Sand Deposit (Site #76), and Cajalco Road / I-15 interchange (Site #78).
- ADL – Soil within the Project limits, including the median, shoulders, and ramps, do not represent a significant environmental or health hazards and, according to the DTSC variance issued to Caltrans, can be classified as unregulated Type X soil, non-hazardous, and can be reused on site without restriction. Per the soil reuse agreement, a LCP is required for worker safety.
- ACM – The gray felt pad along the SB and NB Brown Canyon Wash Bridge and Weirick Road Undercrossing Bridge inner guard rails contain ACM. In addition, there is a potential for all 14 bridges that require widening to contain ACMs in areas that have not been sampled.
- LBP – The light gray paint on the railing of NB Temescal Wash Bridge and in the yellow lane surface paint at NB Indian Wash Bridge contain LBP. In addition, there is a potential for all 14 bridges that require widening to contain LBP in areas that have not been sampled.
- TWW – Wooden guardrail posts may have been treated with creosote and pentachlorophenol.
- PTS – Yellow paint used for lane striping and pavement marking along I-15 within Caltrans ROW may contain lead chromate.
- Construction Generated Hazardous Waste – Construction of the proposed Project may generate hazardous waste. Hazardous wastes generated during construction of the proposed Project would require disposal and could include used oil (not hazardous), sediment from vehicle washing, petroleum materials, cleaning solvents, and paint.

This page is intentionally blank.

11 Opinions

Based on the findings of our assessment, HDR provides the following opinions for environmental conditions that have been identified for the proposed Project:

- Hazardous Material Sites within Project Limits – Although no open cases involving LUST or spills were identified within the Project limits, there is a potential for encountering unexpected or unknown contaminants during soil disturbance activities at six hazardous material sites, they are: Nichols Road / I-15 interchange (Site #32), Gavilon Wash Bridge (Site #34), Indian Truck Trail / I-15 interchange (Site #49), Temescal Canyon Road / I-15 interchange (Site #55), Coronita Ranch Sand Deposit (Site #76), and Cajalco Road / I-15 interchange (Site #78). It is the opinion of HDR that a HASP, CMMP, and CCP be prepared for the Project that will outline specific procedures for encountering expected and unexpected contaminants, including silica sand, to protect worker health and safety.
- ADL –Soil within the Project limits, including the median, shoulders, and ramps, do not represent a significant environmental or health hazards and, according to the DTSC variance issued to Caltrans, can be classified as unregulated Type X soil, non-hazardous, and can be reused on site without restriction. Per the soil reuse agreement, a LCP is required for worker safety. It is the opinion of HDR that prior to construction, a LCP be prepared by a CIH to protect workers from exposure to lead associated with ADL.
- ACM – The proposed Project would include the widening of 14 bridges. ACM is present in the gray felt pad along the SB and NB Brown Canyon Wash Bridge and Weirick Road Undercrossing Bridge inner guard rails and may be impacted by the proposed Project. In addition, there is a potential for all 14 bridges to contain ACMs in areas that have not been sampled. It is the opinion of HDR that ACM content be sampled for all areas of the 14 affected bridges that will be disturbed by the Project during the PS&E phase, prior to any demolition or disturbance activities to determine proper handling and disposal requirements.
- LBP – The proposed Project would include the widening of 14 bridges. LBP is present in the light gray paint on the railing of NB Temescal Wash Bridge and in the yellow lane surface paint at NB Indian Wash Bridge and may be impacted by the proposed Project. In addition, there is a potential for all 14 bridges to contain LBP in areas that have not been sampled. It is the opinion of HDR that LBP content be sampled for all areas of the 14 affected bridges that will be disturbed by the Project during the PS&E phase, prior to any demolition or disturbance activities to determine proper handling and disposal requirements.
- TWW – Wooden guardrail posts may have been treated with creosote and pentachlorophenol (common wood preservatives). It is the opinion of HDR that treated wood objects are handled as TWW and managed per Chapter 34, Title 22 California Code of Regulations Sections 67386.1 through 67386.12, “Alternative Management Standards for Treated Wood Waste,” and in accordance with Caltrans Standard Specifications, Section 14-11.14 Treated Wood Waste. All TWW should be properly disposed at a landfill permitted to accept TWW.

- PTS – Yellow traffic striping and pavement marking materials along I-15 may contain hazardous levels of lead chromate. It is the opinion of HDR that yellow paint used for lane striping and pavement markings along I-15 should be evaluated for lead chromate prior to disposal.
- Construction Generated Hazardous Waste – Construction of the proposed Project may generate hazardous waste. Hazardous wastes generated during construction of the proposed Project would require disposal and could include used oil (not hazardous), sediment from vehicle washing, petroleum materials, cleaning solvents, and paint. It is the opinion of HDR that all hazardous waste generated during construction should be handled, stored, and disposed of in accordance with Caltrans Standard Specifications, Section 7-107A of the Construction Manual.

12 Conclusions

This ISA has been performed in general accordance with the scope and limitations of ASTM E1527-13 and the Caltrans ISA procedures listed in Section 2.1. This assessment has revealed no indication of RECs in connection with the Project limits; however, the following environmental conditions have been identified:

- There is a potential for encountering unexpected or unknown contaminants during soil disturbance activities at six hazardous material sites, they are: Nichols Road / I-15 interchange (Site #32), Gaviion Wash Bridge (Site #34), Indian Truck Trail / I-15 interchange (Site #49), Temescal Canyon Road / I-15 interchange (Site #55), Coronita Ranch Sand Deposit (Site #76), and Cajalco Road / I-15 interchange (Site #78).
- Soil within the Project limits are non-hazardous and can be reused on site without restriction per DTSC ADL variance issued to Caltrans.
- ACM in the Brown Canyon Wash Bridge and Weirick Road Undercrossing Bridge.
- LBP in the Temescal Wash Bridge and Indian Wash Bridge.
- Creosote and pentachlorophenol in wooden guardrail posts.
- Lead chromate in traffic striping and pavement marking materials.
- Construction generated hazardous waste.

13 Recommendations

Based on the findings of the ISA, Measures HW-1 through HW-8 are recommended to help protect worker health and safety, the public, and the environment. These measures would substantially reduce the likelihood of adverse effects related to temporary impacts associated with hazardous wastes and materials for the proposed Project.

13.1 Avoidance, Minimization, and Mitigation Measures

- HW-1 Asbestos Containing Materials and Lead-Based Paint.** The Project would include the widening of 14 bridges. Asbestos containing materials (ACM) is present in the gray felt pad along the southbound and northbound Brown Canyon Wash Bridge and Weirick Road Undercrossing Bridge inner guard rails. In addition, lead-based paint (LBP) is present in the light gray paint on the railing of northbound Temescal Wash Bridge and in the yellow lane surface paint at northbound Indian Wash Bridge. ACM and LBP associated with these bridges may be impacted by the Project. In addition, there is a potential for all 14 bridges to contain ACMs and LBP in areas that have not been sampled. The Riverside County Transportation Commission’s (RCTC) resident engineer or designated contractor will ensure that ACM and LBP content will be sampled for all areas of the 14 affected bridges that will be disturbed by the Project during the Plans, Specifications, and Estimates phase, prior to any demolition or disturbance activities. RCTC’s resident engineer or designated contractor will ensure that the survey will be conducted in conformance with the United States Environmental Protection Agency National Emission Standards for Hazardous Air Pollutants 40 Code of Federal Regulations (CFR), South Coast Air Quality Management District Rule 1403, and in accordance with Caltrans Standard Specifications, Section 14-11.13, Disturbance of Existing Paint Systems on Bridges, and Section 14-11.16, Asbestos-Containing Construction Materials in Bridges.
- HW-2 Treated Wood Waste.** Wooden guardrail posts may contain creosote and pentachlorophenol. During construction, RCTC’s resident engineer or designated contractor will ensure that treated wood objects are handled as treated wood waste (TWW) and managed per Chapter 34, Title 22 California Code of Regulations Sections 67386.1 through 67386.12, “Alternative Management Standards for Treated Wood Waste,” and in accordance with Caltrans Standard Specifications, Section 14-11.14 Treated Wood Waste. All TWW should be properly disposed at a landfill permitted to accept TWW.
- HW-3 Paint and Thermoplastic Striping.** Paint used for traffic striping and pavement marking may contain lead chromate. During construction, RCTC’s resident engineer or designated contractor will ensure that sampling, analysis, removal, and disposal of any traffic striping and pavement materials will be completed in accordance with Construction Program Procedure Bulletin 99 2, and Caltrans Standard Specifications, Section 14-11.12. Removal of Yellow Traffic Stripe and Pavement Marking with Hazardous Waste Residue and Section 36-4 Residue Containing Lead from Paint and Thermoplastic (2018) and be consistent with the requirements within Caltrans Construction Manual, Chapter 7-107E

Removing Yellow Traffic Stripe and Pavement Marking with Hazardous Waste Residue (2019). Before disposal, the contractor is required to sample the removed material for proper waste classification. Yellow traffic stripe and pavement marking that is characterized as hazardous waste requires disposal to a Department of Toxic Substances Control (DTSC) permitted Class I disposal facility.

HW-4 Construction Generated Hazardous Waste. Construction of the proposed Project may generate hazardous waste. Hazardous wastes generated during construction of the proposed Project would require disposal and could include used oil (not hazardous), sediment from vehicle washing, petroleum materials, cleaning solvents, and paint. RCTC's resident engineer or designated contractor will ensure that all hazardous waste generated during construction will be handled, stored, and disposed of in accordance with Caltrans Standard Specifications, Section 7-107A of the Construction Manual.

HW-5 Construction Health and Safety Plan. Prior to construction, RCTC's resident engineer or designated contractor will ensure the development of a Health and Safety Plan (HASP) to guide all construction activities. A Certified Industrial Hygienist (CIH) will review this plan, based on evaluations of proposed construction activities, the potential hazards identified in this report, and any future assessment prepared for the Project. This plan will contain specific procedures for encountering expected and unexpected contaminants, including silica sand associated with the Coronita Ranch Sand Deposit site. It will prescribe safe work practices, contaminant monitoring, personal protective equipment, emergency response procedures, and safety training requirements to protect construction workers and third parties. The plan will meet the requirements of 29 CFR 1910 and 1926, and all other applicable Federal, State, and local regulations and requirements. The designated contractor will be responsible for preparing the HASP before the start of construction.

HW-6 Contaminated Media Management Plan. Prior to construction, RCTC's resident engineer or designated contractor will ensure the preparation of a Contaminated Media Management Plan (CMMP). This plan will include procedures for contaminant monitoring and identification, temporary storage, handling, treatment, and disposal of waste and materials (including soil), in accordance with applicable Federal, State, and local regulations and requirements. The designated contractor will be responsible for preparing the CMMP before the start of construction.

HW-7 Construction Contingency Plan. Prior to construction, RCTC's resident engineer will ensure the preparation of a Construction Contingency Plan (CCP), in accordance with the guidance provided in Chapter 7-107 of the Caltrans Construction Manual for handling and dealing with unknown hazards (see Appendix J for Caltrans Unknown Hazards Procedure). This plan will include provisions for responding to events such as the discovery of unidentified underground storage tanks (UST), hazardous materials, petroleum hydrocarbons, or hazardous or solid wastes during construction. This plan will address UST decommissioning, field screening, and material testing methods; mitigation and contaminant management requirements; and health and safety requirements for construction workers. If an unexpected release of hazardous substances is found in

reportable quantities, the National Response Center must be notified by calling 1-800-4248802, and cleanup must be coordinated with environmental agencies. The designated contractor will be responsible for preparing the CCP before the start of construction.

HW-8

Lead Compliance Plan. Soil within the Caltrans right of way (ROW) of the Project limits, including the median, shoulders and ramps, were sampled for aerially deposited lead (ADL). The ADL survey classified the soil in these areas as unregulated Type X soil, which is non-hazardous and suitable for reuse on site without restriction, under the July 1, 2016, ADL Agreement between Caltrans and the DTSC. This ADL Agreement allows such soils to be safely reused within the Project limits, as long as all requirements of the ADL Agreement are met. Per the soil reuse agreement, a Lead Compliance Plan (LCP) is required for worker safety. Prior to construction, RCTC's resident engineer or designated contractor will ensure that a LCP is developed by a CIH, to protect workers from exposure to lead associated with ADL, as well as LBP, and traffic stripe and pavement makings. The LCP will include procedures for the handling, management, sampling, and disposal of material containing lead. ADL and LBP investigations and traffic striping removal are separate tasks usually conducted by separate contractors, which each require a separate LCP.

14 Signature of Environmental Professional

As required by 40 CFR 312.21(d) and Section 12.12 of ASTM E1527-13, the environmental professional's statement and signature are provided below in support of the contents of this report.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance to the standards and practices set forth in 40 CFR Part 312.

Signature:  _____ Date: 12/9/2021

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 7/30/2019
Citation: 23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 08/29/2019. OBSERVATION: The designated operator failed to document all the alarms from the attached alarm history on the July 2018 and July 2019 designated operator monthly inspection report(s) and failed to check that they were responded to appropriately. The missing alarms include: L22 on July 13, 2019 and L 32 on July 6, 2018. During the monthly inspection, the designated operator shall review the alarm history for the previous month, check that each alarm was documented and responded to appropriately, and attach a copy of the alarm history with documentation taken in response to any alarms to the monthly report. CORRECTIVE ACTION: Owner/operator shall ensure that designated operators performing monthly inspections at this facility are including all of the required information on the reports. Update alarm log to include the missing alarms and a description of the corrective action taken to clear the alarms. OBSERVATION: Observed that Designated Operator inspections are [Truncated]

Violation Date: 7/30/2019
Citation: HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7, Section(s) 25284, 25286
Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 08/29/2019. OBSERVATION: Observed UST tank information pages submitted in CERS to be inaccurate and/or missing information. For the information pages for tank 1 holding Regular fuel and tank 2 holding premium the tank construction lists primary containment being steel however inspector observed tanks with fiberglass primary containment. For this same section under overflow prevention, Audible/Visual Alarms should be marked as yes because ATGs were observed at the time of inspection. For tank 1 under Product/Waste Piping Primary and Secondary containment are listed as rigid plastic but fiberglass was observed for both primary and secondary containment. On both tank 1 and tank 2 under Vent, Vapor Recovery (VR) and Riser/ Fill Pipe Piping Construction Primary Containment, Secondary Containment, Vapor Recovery Primary Containment, Vapor Recovery Secondary Containment and Riser Pipe Secondary Containment list rigid plastic however fiberglass were observed for all piping. In the Under [Truncated]
Violation Division: Riverside County Department of Env Health

Violation Date: 7/30/2019
Citation: 23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)
Violation Description: Failure to have an approved UST Monitoring Plan.
Violation Notes: Returned to compliance on 08/29/2019. OBSERVATION: Observed UST Monitoring Plan(s) for tank 1 holding 87, tank 2 holding 91 and tank 3 holding diesel to be inaccurate and/or missing information. Under the Under Dispenser Containment (UDC) Monitoring, the UDC Monitoring Stops the Flow of Product at Dispenser is marked yes, however on all 3 tanks it was observed this occurs at the turbine. Also in this section for all 3 tanks UDC leak sensor model lists 304 but 304 and 208 sensors were observed. For this section on all 3 tank monitoring plans the UDC Monitoring Stops the Flow of Product at Dispenser should be marked no.

Also add 208 sensors to the UDC leak sensor model section. UST Monitoring Plan is not approved as submitted. CORRECTIVE ACTION: Owner/operator shall make the corrections noted above to the UST Monitoring Plan(s) and submit in CERS.

Violation Division: Riverside County Department of Env Health
Violation Program: UST
Violation Source: CERS

Site ID: 391913
Site Name: Eagle Glen Mobil
Violation Date: 7/30/2019
Citation: HSC 6.7 25293 - California Health and Safety Code, Chapter 6.7, Section(s) 25293

Violation Description: Failure to maintain UST records in sufficient detail to enable the UPA to determine whether the UST systems are in compliance.

Violation Notes: Returned to compliance on 08/29/2019. OBSERVATION: Observed UST maintenance, repair, monitoring records to be illegible and/or lacking sufficient detail to determine if UST systems are in compliance. Specifically the L12 alarm that occurred on July 6, 2018 was addressed but there was no follow up actions included. CORRECTIVE ACTION: Owner/operator shall ensure UST records are completed so as to be legible and in sufficient detail to verify compliance. The alarm log shall include the actions taken to clear the alarm.

Violation Notes: Returned to compliance on 06/10/2019. The vent and vapor piping is listed as single walled on CERS. Technician confirmed both are double walled fiberglass. The riser pipe secondary containment is listed as none, even though they are secondarily contained by the sumps and the tanks. The vent piping transition sumps is listed as none, even though there is one on site. Owner/operator shall update vent and vapor piping to double walled, riser pipe as secondarily contained, and change vent piping transition sumps to yes on the tank information pages on CERS.

 Status Date: 07/15/2014
 Case Worker: AB
 RB Case Number: 083303820T
 Local Agency: RIVERSIDE COUNTY LOP
 File Location: Local Agency
 Local Case Number: 200117545
 Potential Media Affect: Aquifer used for drinking water supply
 Potential Contaminants of Concern: Gasoline
 Site History: Environmental case opened for the Site in September 2000 when petroleum hydrocarbon impacts to Site soils were discovered during product piping and dispenser island upgrades. The leak was stopped and no possible existing sources are present due to product piping replacement. A total of 41.74 tons of soil containing petroleum hydrocarbons was removed from the Site during the upgrade activities. Petroleum hydrocarbons and fuel oxygenates are present in soil and groundwater in the vicinity of the eastern dispenser island (source area). The SVE system began operation on January 22, 2009, and the AS system began operation on March 3, 2009. During the first quarter 2010, the SVE and AS remediation system operated at the Site from December 1, 2009 through January 19, 2010. Soil assessment has been completed and the extent of petroleum hydrocarbons in soil is delineated on-Site. Residual mass has not been calculated post-remediation (January 19, 2010). Groundwater assessment is ongoing, with groundwater delineated. Concentrations in groundwater have decreased significantly plume appears to have stabilized. The groundwater plume is delineated at the Site. Groundwater monitoring well MW-1 remains the only well with concentrations of TPHg (2,800 ppb), ethylbenzene (23 ppb) and total xylenes (8.8 ppb). The remaining COC is TPHg and groundwater is below MCLs for TPHg, BTEX, and fuel oxygenates in all remaining wells. SITE HISTORY Site History/Release Information: 1989: Two 10,000-gal gasoline USTs and one 550-gal waste oil UST were removed and replaced with two 12,000-gal USTs and one 550-gal UST. The five soil samples collected did not indicate a release had taken place. September 2000: Soil samples collected during product piping and dispenser island upgrades indicated that a release had taken place near the eastern (closest to Main St) dispenser islands. Soil staining observed in the piping trench (PL-3) between these dispenser islands was further assessed with the advancement of eight (8) shallow hand auger borings (HA-1 through HA-8). Maximum concentrations were detected in sample HA-6 at 2 ft (2000 ppm TPHg, ND B, 174 ppm X, ND MTBE). Impacted soil (41.74 tons) generated during station upgrades was recycled at TPS in

7-ELEVEN STORE #36788 (Continued)

S113014248

Adelanto. The site was placed into LOP. Assessment: December 2001: Four soil borings (B-1, B-2, B-3 and B-4) were advanced near the southern dispenser islands where soil staining and impacted soils were encountered. Groundwater (GW) was encountered at approximately 41 feet below grade (ft bg), so three of the four borings were completed as GW monitoring wells (B-2/MW-1, B-3/MW-2 and B-4/MW-3). Soil samples from B-2/MW-1 (closest to the eastern dispensers) were impacted with the highest concentrations at 30 ft bg: 3400 ppm TPHg, 6.2 ppm B, 140 ppm T, 51 ppm E, 480 ppm X, ND oxygenates. GW concentrations in wells MW-2 and MW-3 were low to non-detect (ND), however, MW-1 had detections of: 1200 ppb TPH-g, 480 ppb B, 1500 ppb T, 1800 ppb X, and ND oxygenates. Several VOCs were also detected (910 ppb 1,2,4-TMB, etc.). August 2004: Three on-site monitoring wells (MW-5, MW-6 and MW-7) were installed south, west, and north of the dispenser islands and one off-site monitoring well (MW-4) was installed east of the dispensers. Soil samples from the four well locations were at or below the detection limits. GW samples collected from the new wells showed elevated concentrations only in well MW-6 (1700 ppb TPPH, 150 ppb B and <20 ppb TXE & MTBE). Additionally, liquid-phase hydrocarbons (LPH) were observed in well MW-1 (0.01 ft) located in the source area between the two eastern dispenser islands. LPH were observed in this well September 2004 and December 2004. August 2006: Eight (8) air sparge (AS-1 through AS-8) wells, four (4) SVE wells (VEW-1 through VEW-4), and two (2) groundwater monitoring wells (MW-8 and MW-9) were installed after dual-phase extraction (DPE) pilot testing was conducted in October 2005 and January 2006. Wells VEW-1 through VEW-4 were completed with screens from 10 to 30 ft bg. Based on the findings, the extents of soil and GW impacts at the site had been adequately delineated and were primarily located in the area of the dispenser islands. Remediation 1989 Remedial Excavation: It was reported that 220 cubic yards of soil was removed from the site during the 1989 UST replacement activities (Closure Request Report, AECOM, October 30, 2013). 2000 Remedial Excavation: During the September 2000 product piping replacement and dispenser upgrades, a total of 41.74 tons of impacted soil was removed and recycled at TPS in Adelanto. October 2005 & January 2006 Dual-Phase Extraction (DPE) Remediation Events: Two 5-day mobile DPE events were conducted utilizing wells MW-1, MW-3, and MW-6 to extract vapors and groundwater. The radius of influence of the vapor extraction was calculated to be 30 ft. The October 2005 DPE event removed 70.60 lbs. of vapor-phase hydrocarbons and 27,040 gal of GW. The January 2006 DPE event removed 90.63 lbs. vapor-phase hydrocarbons and 20,660 gal of GW. Due to the large amount of water generated, air-sparge was later proposed and implemented to reduce GW hydrocarbon concentrations. January 2009 to May 2013 Soil Vapor Extraction (SVE) Remediation: A SVE system extracted vapors from wells VEW-1 through VEW-4 from January 2009 to January 2010 and from October 2010 to May 2013. A cumulative total of 25,393 lb TPH-g, 476.8 lb B, 1381 lb T, 114.65 lb E, 735 lb X and 162.6 lb MTBE were removed and treated during this time. March 2009 to November 2011 Air Sparge (AS) Remediation: An AS system operated from March 2009 to January 2010 and again from October 2010 to November 2011 utilizing wells AS-1 through AS-8. The temporary system shut down for South Coast Air Quality Management District (SCAQMD) permit renewal. The system operated a total of 17,195 hours. Groundwater Monitoring: GW monitoring was initiated in 2001 following the installation of MW-1 through MW-3. Historical depth to GW have fluctuated between

S113014248

approximately 29 to 41 ft bg and is currently 38 to 40 ft bg. From 2001 to 2005, GW elevation rose approximately 10 feet. Since 2005, GW elevations have fallen to pre-2005 elevations. The GW flow direction has been primarily to the west and southwest at 0.001 ft/ft. LPH was observed at a thickness of 0.01 ft in MW-1 Q3 2004 and Q4 2004. The lateral extent of hydrocarbons in the GW is limited to the vicinity of the dispenser islands. Highest concentrations have been in well MW-1 with 0.01 ft LPH (2004), 89000 ppb TPH, 2500 ppb B, 16000 ppb T, 13000 X, 2700 ppb E, 110 ppb MTBE. Benzene and MTBE have been below drinking water maximum contaminant Levels (MCLs) of 1 g/l and 13 g/l respectively, since 2009. Recent maximum GW concentrations were: 1200 ppb TPHg (MW-1), ND<0.083 ppb B (All wells), ND TXE, ND<0.11 ppb MTBE, and ND<9.4g/L TBA. Verification: Soil verification: Confirmation soil borings CB-1 and CB-2 were advance to 50 ft bg and 10 ft bg, respectively. Soil samples were analyzed from each 5-ft depth interval. All samples were at or below the laboratory detection limits for TPHg, BTXE, and oxygenates. Vapor verification: A SVE rebound test was conducted from May 13 through 17, 2013 using wells VEW-1, VEW-2, VEW-3, and VEW-4. Vapor samples were collected from each well and the combined system influent at system restart, after 2 hours of operation, after 8 hours of operation, after 24 hours of operation and daily thereafter. Results showed the highest vapor concentrations of 2.3J ppmv TPH-g, ND<0.0054 ppbv benzene, 0.45 ppbv toluene, 0.19 ppbv ethylbenzene, 1.2 ppbv total xylenes, ND<0.0096 ppbv MtBE. The SVE influent mass removal rate at shutdown on April 9, 2013, was 1.16 pounds per day. The mass removal rate for influent samples collected from May 13 through May 17, 2013, ranged from 0.08 to 0.53 pounds per day. Groundwater verification: Based on GW monitoring data, benzene and MTBE have been below drinking water MCLs of 1 and 13 g/l, respectively, since at least 2009. LPH has not been observed in any of the wells since 2004. The lateral extent of hydrocarbons in GW is limited to the vicinity of the dispenser islands and is defined by analytical results below laboratory detection limits. TPHg is present only in MW-1 (1200 ppb) and shows a decreasing trend. Laboratory analytical results for a GW grab sample collected from CB-1 detected 170 ppb TPH-g and 0.18J ppb B. MTBE and TBA were not detected. Other information: Land Use: The site is currently a vacant, fenced former 76-brand gasoline service station located near the southwestern corner of the intersection of Main Street and Interstate 15 in Lake Elsinore, California. The site vicinity consists of vacant, residential and commercial properties. Plans for property redevelopment for service station use are in progress. Sensitive Receptors: Elsinore Elementary School: 0.4 mile southwest; Church of Christ: 0.4 mile south; Lake Providence Baptist Church: 0.23 mile southwest; First Lutheran Church: 0.5 mile southwest; First Christian Church: 0.5 mile southwest; Yarbrough Park: 0.3 mile west. The nearest surface water body is Lake Elsinore, located 0.9 mi southeast of the site. The nearest surface water body is Temescal Wash, a concrete-lined flood control channel, located 1,000 feet west of the site. 7/11/2014 Documentation of well destruction received by RCDEH 7/15/2014 Case closure letter issued by RCDEH. NOTE: This closure summary does not include all of the data for this cleanup. It was prepared by the Riverside County DEH for the purpose of providing a brief summary of the cleanup case. The Closure Request Report (AECOM, October, 30, 2013) and the RCDEH case file should be reviewed to obtain further details regarding this cleanup.

disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Primary Waste: SLDWST
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Secondary Waste: Not reported
Secondary Waste Type: Not reported
Base Meridian: Not reported
NPID: Not reported
Tonnage: 0
Regional Board ID: Not reported
Municipal Solid Waste: False
Superorder: False
Open To Public: False
Waste List: False
Agency Type: Private
Agency Name: SYNAGRO
Agency Department: Not reported
Agency Address: PO BOX 7027
Agency City,St,Zip: CORONA CA 91718
Agency Contact: LORRIE LODER
Agency Telephone: 9092772662
Land Owner Name: Not reported
Land Owner Address: Not reported
Land Owner City,St,Zip: Not reported
Land Owner Contact: Not reported
Land Owner Phone: Not reported
Region: 8
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Facility Description: Not reported
Facility Telephone: Not reported
SWAT Facility Name: Not reported
Primary SIC: 2875
Secondary SIC: Not reported
Comments: Not reported
Last Facility Editors: Not reported
Waste Discharge System: True
Solid Waste Assessment Test Program: False
Toxic Pits Cleanup Act Program: False
Resource Conservation Recovery Act: False
Department of Defence: False
Solid Waste Assessment Test Program: Not reported
Threat to Water Quality: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-25-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Performed a "paperwork inspection" due to no inspector being on site for the annual testing. Greg Vasquez indicated over the phone that the monitoring system certification was performed on 12/13/18 while on site due to there being no testing results on site or submitted to the Department of Environmental Health. Greg indicated no failures of equipment was observed during the testing. The alarm history report also indicated testing was performed on 12/13/18. Note: the monitoring system certification was performed late and must be performed in November each year. If the monitoring system certification is not performed in November of 2019, monetary fines may be issued to the owner/operator.

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site ID: 532509
Site Name: Gail Materials Inc
Violation Date: 7/1/2014
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Late Report
Violation Notes: 2013-2014 annual report was not received on 7/1/2014. First Notice of Non-Compliance is sent out on 8/7/2014 via certified mail, with return receipt, along with a regular mail as a copy to owner's address.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-06-2008
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Site drains into itself. It is mostly mined out. But they separate materials, store materials, mix materials, etc. They have owned the property for about five years, but it has been operated before that for about 30 years. A flood control channel empties onto their property directly south of the main mine. The pond area is their property and it overflows directly into the Temescal Wash. The pond contains fish and is fed by runoff from a flood control channel. They mine/dredge the pond on occasion because if they don't the pond floods onto their site. They use the dredged materials for product.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Notes: characteristics of the Hazardous Waste, and starting accumulation date.
Returned to compliance on 08/22/2019. OBSERVATION: Observed used oil bins and used filter bins that were missing proper labels. CORRECTIVE ACTION: Owner/operator shall label hazardous waste containers with all the required information. Label shall include at least: the words ""hazardous waste"", generator name and address, accumulation start date, composition and physical state of waste, and hazardous property statement. Submit photos to this department, if applicable.

Violation Date: 8/30/2018
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: Returned to compliance on 09/30/2018. OBSERVATION: The annual business plan certification submitted in the statewide information management system was rejected. No resubmission was observed. A notice was previously mailed from RivCo DEH requiring submission of a business plan. CORRECTIVE ACTION: Owner/Operator shall submit an updated business plan in the statewide information management system at <http://cers.calepa.ca.gov> in accordance with the letter(s) previously sent to this facility. The compliance deadline for this violation will be pursuant to the date specified in the letter mailed to you by this Department, rather than 30 days from the date of this report. Business plans shall be reviewed and certified on at least an annual basis.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS ID: 10324828
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 122083
Site Name: Porter Rents, llc
Violation Date: 5/31/2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 08/31/2017.
Violation Division: Riverside County Department of Env Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 122083
Site Name: Porter Rents, llc
Violation Date: 9/19/2019
Citation: Un-Specified
Violation Description: Business Plan Program - Operations/Maintenance - General Local Ordinance
Violation Notes: Returned to compliance on 10/03/2019. OBSERVATION: A required NFPA-704 sign was not posted on the front entrance to the shop. The NFPA 704 sign posted inside the weld shop is not posted in a visible location. CORRECTIVE ACTION: Owner/operator shall post a NFPA sign on the front entrance to the shop and in a visible location for the weld shop.
Violation Division: Riverside County Department of Env Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 122083
Site Name: Porter Rents, llc
Violation Date: 9/19/2019
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 10/03/2019. OBSERVATION: Observed a 55 gallon poly barrel containing used antifreeze with the top 1/3 of the barrel cut off and no lid. CORRECTIVE ACTION: Owner/operator shall maintain all hazardous waste containers closed when not adding/removing hazardous waste.
Violation Division: Riverside County Department of Env Health

Violation Date: 5/31/2016
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years.
Violation Notes: Returned to compliance on 08/31/2017.
Violation Division: Riverside County Department of Env Health
Violation Program: APSA
Violation Source: CERS

Site ID: 122083
Site Name: Porter Rents, llc
Violation Date: 7/5/2017
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 07/20/2017.
Violation Division: Riverside County Department of Env Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 122083
Site Name: Porter Rents, llc
Violation Date: 9/19/2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 10/03/2019. OBSERVATION: Observed a 55 gallon poly barrel containing used antifreeze with no label. CORRECTIVE ACTION: Owner/operator shall label hazardous waste containers with all the required information. Label shall include at least: the words ""hazardous waste"", generator name and address, accumulation start date, composition and physical state of waste, and hazardous property statement. Submit photos to this department, if applicable.

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 19 CCR 6.95 25508(a)(1) - California Code of Regulations, Title 19, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 12/07/2016. Business activities not accepted on CERS
Violation Division: Corona Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 402534
Site Name: Oil & Water Corona, LP
Violation Date: 1/8/2020
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, - 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: OBSERVATION: An overfill equipment inspection was not completed by the October 13, 2018 deadline. CORRECTIVE ACTION: Owner/operator shall immediately schedule and complete an overfill equipment inspection providing the required 48 hour notification prior to conducting the inspection. Inspection results and all supporting documentation (inspection procedures used, tank charts, printouts, etc.) must be submitted to this Department within 30 days upon completion of the inspection.

Eval Notes: - Technician on site was John Babcock #8897114 - Observed liquid in the diesel fill sump. Owner/operator shall ensure that all liquids are pumped out and sumps are kept clean. - The following items need to be corrected on CERS: 1. All three tanks - UDC Monitoring section indicates that UDC monitoring stops flow of product at the dispenser. Please mark "NO". 2. Tank #1: Vent/Vapor/Riser Construction section indicates "NONE" for secondary containment. Please update section to indicate what type of construction is used for secondary containment. 3. All three tanks: Remove ball float as method of overfill prevention. ATG was the only method of overfill that was tested. - Overfill test is being done on this date (12/27/2018): Send Overfill Test results and all required documents (tank charts, manufacture specification, Veeder Root print out, overfill prevention equipment inspection form) to the Department within 30 days. - Diesel LLD was not tested at furthest [Truncated]
